This performance report ("Report") is based upon information obtained by Segal RogersCasey ("SRC") from third parties over which SRC does not exercise any control. Although the information collected by SRC is believed to be reliable, SRC cannot verify or guarantee the accuracy or validity of such information or the uniformity of the manner in which such information was prepared. The rates of return reflected herein are time weighted and geometrically linked on a monthly basis using a modified Dietz method. Monthly valuations and returns are calculated based on the assumptions that all transactions and prices are accurate from the custodian and /or investment manager. The client to whom Segal RogersCasey delivers this Report ("Client") agrees and acknowledges that this Report has been prepared solely for the benefit of Client. SRC disclaims any and all liability that may arise in connection with Client's conveyance (whether or not consented to by SRC) of the this Report (in whole or in part) to any third party. Client further agrees and acknowledges that SRC shall have no liability, whatsoever, resulting from, or with respect to, errors in, or incompleteness of, the information obtained from third parties. Client understands that the prior performance of an investment and /or investment manager is not indicative of such investment's and/or investment manager's future performance. This Report does not constitute an offer or a solicitation of an offer for the purchase or sale of any security nor is it an endorsement of any custodian , investment and/or investment manager.

Fourth Quarter 2013 Investment Performance: Summary by Asset Class

This section provides data on investment performance for select market indices mostly for the fourth quarter (Q4) 2013, as well as Segal Rogerscasey's commentary.

Asset Class Summary: Quarter-to-Date (QTD) and One-Year Returns

Asset Class	Indices	QTD	YTD	1-Year	3-Year	5-Year	10-Year
Equities	MSCI World (Net of dividends)	8.00	26.68	26.68	11.49	15.02	6.98
	Russell 3000	10.10	33.55	33.55	16.24	18.71	7.88
	MSCI EAFE (Net of dividends)	5.71	22.78	22.78	8.17	12.44	6.91
	MSCI EM (Net of dividends)	1.83	-2.60	-2.60	-2.06	14.79	11.17
Fixed Income	Barclays Capital Aggregate	-0.14	-2.02	-2.02	3.26	4.44	4.55
	Citigroup Non-U.S. WGBI (Unhedged)	-1.24	-4.56	-4.56	0.62	2.27	4.10
Other	Commodity Splice*	-0.69	-5.37	-5.37	-4.44	2.69	0.79
	NCREIF NPI	2.53	10.98	10.98	11.92	5.69	8.64
	Thomson Reuters Private Equity**	3.43	7.52	15.67	10.99	4.34	9.48
	HFRI Fund of Funds Composite	3.48	8.73	8.73	2.41	4.82	3.36

*Commodity Splice, a Segal Rogerscasey index, blends the DJ UBS Commodity Index (50%) and the S&P GSCI Index (50%), rebalanced monthly.

**Performance reported as of Q2 2013 because Q3 2013 and Q4 2013 performance data is not yet available.

Sources: eVestment Alliance, Hueler Analytics, Thomson One and Hedge Fund Research, Inc.

World equity markets were positive in Q4. On a global factor* basis for Q4, price momentum, high Beta and large stocks had strong performance, while high volatility, high historical sales growth, and low P/B performed poorly.

Global fixed income was negative during Q4. US Treasury Yields rose from last quarter across the curve (except for the 1 mo.) The Federal Reserve announced a \$10 billion reduction to its bond-buying program.

Commodities had negative performance in Q4. Notable outperformance was in natural gas, soybean meal, zinc, and unleaded gas. Significant underperformers were wheat, silver, sugar and gold.

Hedge Fund of Funds were positive overall for 2013, with the strategic and diversified performing the best. On a year-to-date basis for Direct Hedge Funds, Equity Hedge, Event-Driven and Relative Value strategies performed well while Macro performed poorly.

*Factors are attributes that explain differences in equity performance. Stocks are sorted based on their exposure to a particular factor, with the factor return being the difference in returns between stocks with high exposure and low exposure to a particular attribute.

World Economy: Key Indicators

This section provides data on select U.S. and global economic indicators for Q4 2013 along with Segal Rogerscasey's commentary.

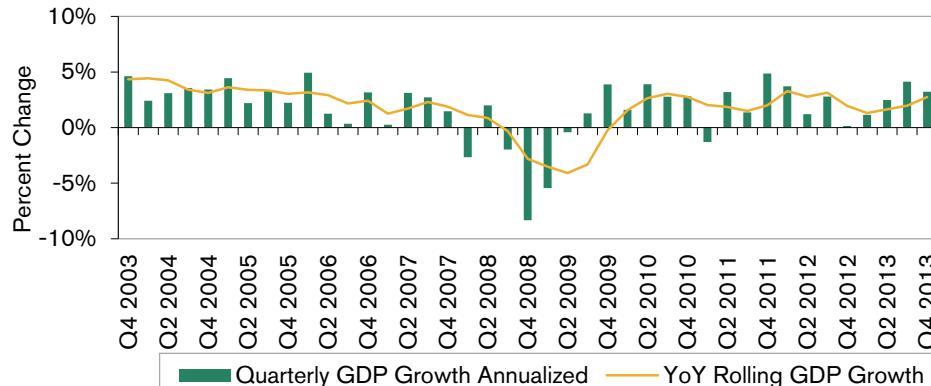

GDP Growth

Real GDP grew at an annualized rate of 3.2 percent in Q4, which was less than the 4.1 percent growth in Q3. In 2013, real GDP rose 1.9 percent versus 2.8 percent in 2012. The adjacent graph shows annualized GDP growth, along with the year-over-year (YoY) rolling percentage change in GDP.

Positives to Q4 GDP growth included consumption, nonresidential fixed investment, inventories and net exports. Decreased government spending was a detractor.

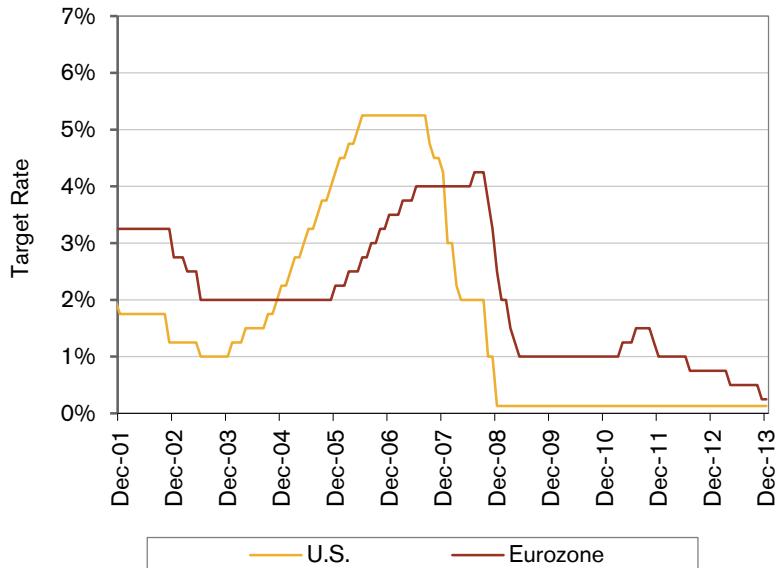

Reduced growth in inventories was a large cause of slower real GDP growth in Q4. Inventory growth was a significant contributor to real GDP in Q3. Consumer spending and net exports both increased substantially over Q3 growth.

U.S. GDP Growth: Annualized Quarterly and Year-over-Year (YoY) Rolling (%)

Source: Bureau of Economic Analysis

Target Rates: U.S. and Eurozone

Sources: Segal Rogerscasey using data from the Federal Reserve Board, the European Central Bank and the Bank of Japan

Monetary Policy

As its December meeting, the Federal Open Market Committee (FOMC) announced it would modestly taper its quantitative easing program starting in January 2014. The FOMC stated it would continue purchasing agency mortgage-backed securities in the amount of \$35 billion each month (down from \$40 billion) and long-term Treasuries in the amount of \$40 billion per month (down from \$45 billion). The FOMC maintained its exceptionally low target range for the Federal Funds Rate between 0.0 and 0.25 percent, and intends to do so as long as unemployment is above 6.5 percent. Over the next one or two years, inflation is projected to be no more than 0.5 percent above the FOMC's 2 percent target.

The European Central Bank (ECB) lowered its target rate to 0.25 percent because the euro appreciated and there was an elevated risk of deflation. The ECB will not deploy another long-term refinancing operation unless it is more confident it would stimulate the economy. Unemployment remained high and private sector lending was still contracting.

The Bank of Japan (BoJ) continued its quantitative and qualitative easing policy with the goal of increasing the monetary base at an annual amount of approximately 60-70 trillion yen. Asset purchases will continue in the following guideline amounts: Japanese Government bonds (JGB) 50 trillion yen annually with average remaining maturity of JGB's of approximately 7 years, exchange-traded funds and Japanese real estate investment trusts annually in the amounts of 1 trillion yen and 30 billion yen, respectively, commercial paper and corporate bonds until they reach 2.2 trillion yen and 3.2 trillion yen, respectively, after which they will maintain those amounts outstanding.

World Economy: Key Indicators

This section provides data on select U.S. and global economic indicators for Q4 2013 along with Segal Rogerscasey's commentary.

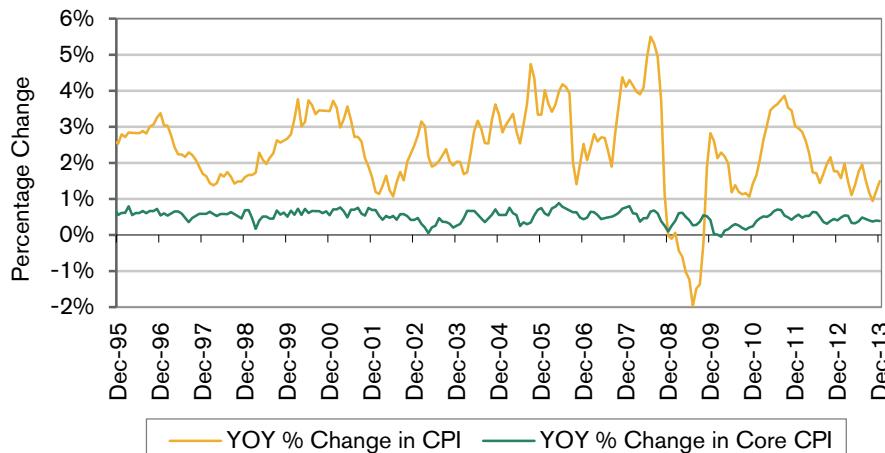

Inflation

The headline Consumer Price Index (CPI)* was up 0.3 percent in Q4 (rising each month), and advanced 1.5 percent on a YoY basis. Major contributors to December's gains included the energy and shelter indices, and minor contributors were apparel, tobacco, and personal care. Detractors were airline fares, recreation, household furnishing and operations, and used cars and trucks.

The food index has experienced very small increases and has not had a monthly gain greater than 0.1 percent since June.

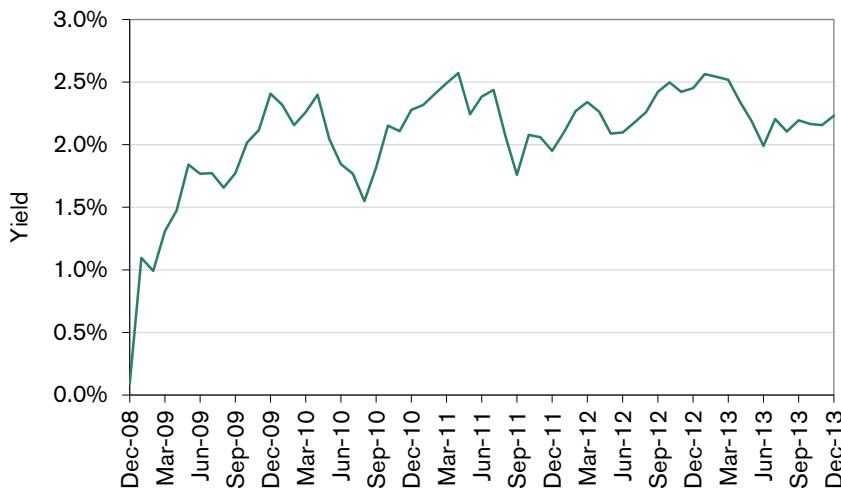

Core CPI, which excludes both food and energy prices, rose 0.4 percent in Q4, bringing the YoY core CPI to 1.7 percent.

Headline CPI and Core CPI: Percentage Change YoY

Source: Bureau of Labor Statistics

10-Year Break-Even Inflation Rate

Source: Bloomberg

Break-Even Inflation

The adjacent graph shows the 10-year break-even inflation rate, which measures the difference in yield between a nominal 10-year Treasury bond and a comparable 10-year Treasury inflation-protected security bond (TIPS). The break-even inflation rate is an indicator of the market's inflation expectations over the horizon of the bond.

The 10-year break-even rate increased from 2.19 percent in Q3 to 2.23 percent in Q4. As noted on page 2 (see "Monetary Policy"), the FOMC announced a modest reduction in its quantitative easing program due to progress in employment and expanded economic activity. The FOMC also noted that longer-term inflation is not projected to be more than 0.5 percent above its target of 2 percent.

World Economy: Key Indicators

This section provides data on select U.S. and global economic indicators for Q4 2013 along with Segal Rogerscasey's commentary.

Labor Market and the Unemployment Rate

Unemployment declined throughout Q4, ending the quarter at 6.7 percent. Nonfarm payroll employment increased by 74,000 jobs in December, which was well below consensus expectations. November payrolls were revised upward by 38,000 to 241,000. October was unchanged at 200,000 jobs.

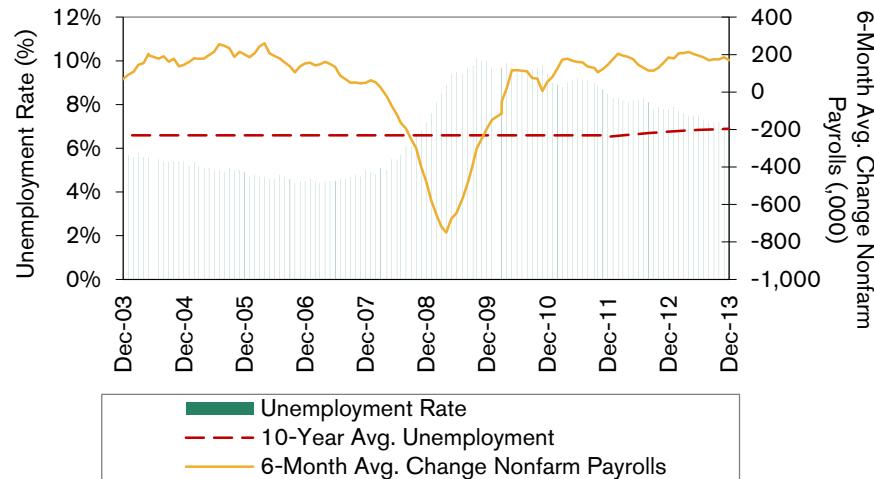

Employment decreases occurred in construction and information technology. Education and healthcare were neutral. Manufacturing and leisure/hospitality minimally increased.

The one-month diffusion index* fell from 61.3 in September to 58.8 in December.

The labor force participation rate declined from 63.2 percent in September to 62.8 percent in December.

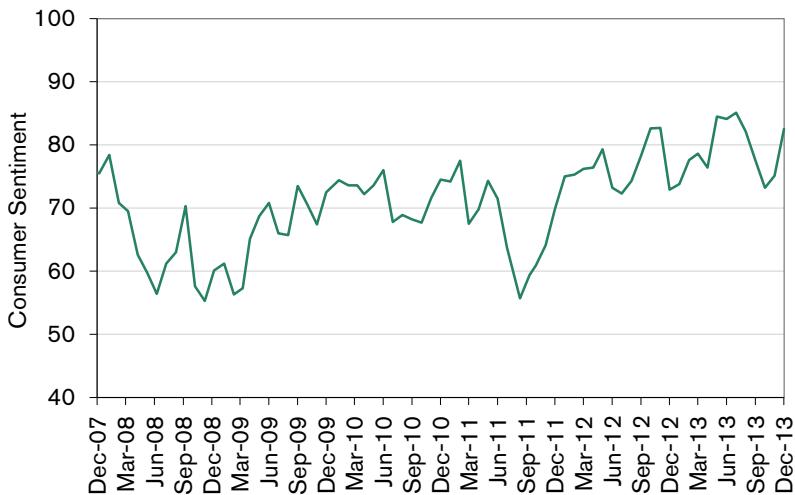

*Per the Bureau of Labor Statistics, figures represent the percent of industries with employment increasing plus one-half of the industries with unchanged employment, where 50 percent indicates an equal balance between industries with increasing and decreasing employment.

Unemployment and Nonfarm Payrolls

Source: Bureau of Labor Statistics

U.S. Consumer Sentiment (December 2007 – December 2013)

Source: Moody's Economy.com using data from the Thomson Reuters/University of Michigan Consumer Sentiment Index

Consumer Sentiment

The University of Michigan Index of U.S. Consumer Sentiment is an economic indicator that measures individuals' confidence in the stability of their incomes as well as the state of the economy. The Consumer Sentiment Index stood at 82.5 for December, up from September's 77.5. Views on both present conditions and expectations increased.

Increased consumer confidence was driven by job growth, the relatively benign effects of the government shutdown, and the continued economic recovery.

Wages and personal income grew slightly.

Inflation expectations on both a 1 and 5 year basis decreased from September to December.

Investor Sentiment: Mutual Fund Flows

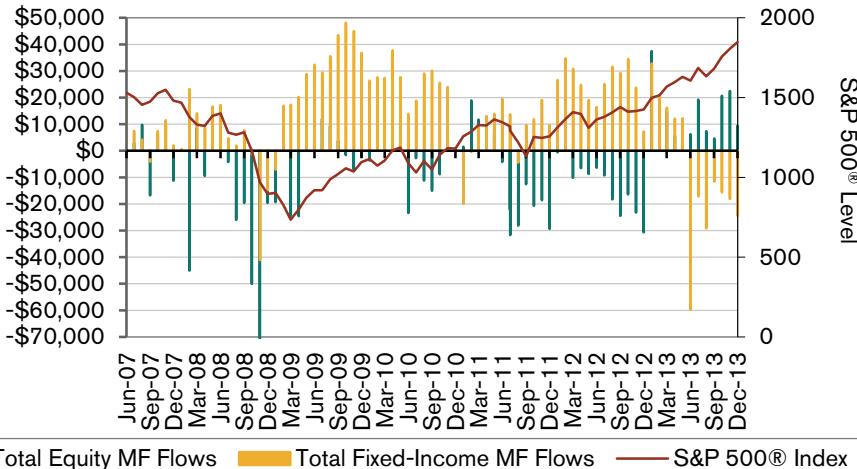

This page presents mutual fund flows across equity and fixed-income funds. Flow estimates are derived from data collected covering more than 95 percent of industry assets and are adjusted to represent industry totals.

Net Mutual Fund Flows

The adjacent graph shows net flows into equity and fixed-income mutual funds. In Q4, mutual funds experienced net outflows of approximately \$5.5 billion. Outflows were once again driven by fixed-income mutual funds, which experienced negative flows in each of the three months through December. Positive economic data and the Federal Reserve (Fed)'s surprise announcement that it would reduce quantitative easing caused rates to rise through year-end. Rates on the short end stayed anchored after the Fed renewed its commitment to keep the interest rate target near zero for the foreseeable future.

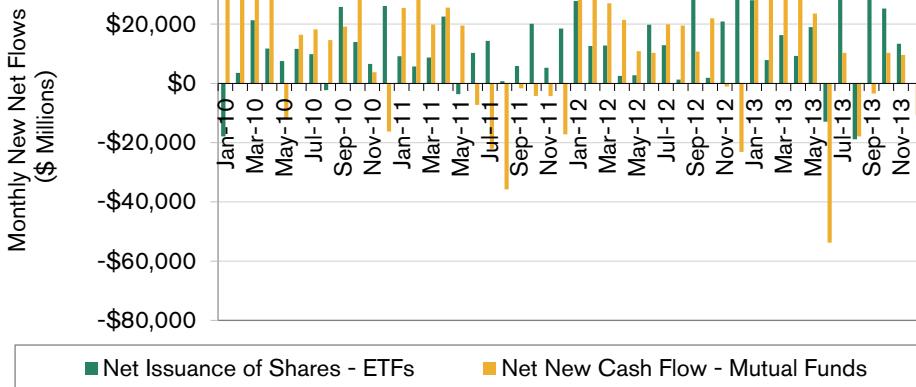

Equity mutual funds experienced \$52.7 billion in inflows during Q4, driven by international mutual fund inflows of \$42.2 billion. Hybrid mutual funds also experienced positive inflows of \$14.6 billion. Domestic equity mutual funds had strong inflows in October and November following an agreement at the beginning of October to end the government shutdown.

Monthly Mutual Fund Net Flows (\$ Millions) Q4 2013

Source: Investment Company Institute <http://www.ici.org>

Mutual Fund Flows vs. ETFs (\$ Millions): New Net Cash Flows

Source: Investment Company Institute <http://www.ici.org>

Mutual Fund Flows vs. Exchange-Traded Funds

Mutual funds had over \$9.0 billion in net inflows during Q4. ETFs experienced net inflows totaling \$38.6 billion during October and November 2013. (December numbers have not yet been reported.) This brings total ETF issuance for 2013 to \$159.9 billion, surpassing the \$58.4 billion in net issuance that ETFs experienced in all of 2012.

Total assets are now \$1.64 trillion, up from \$1.3 trillion in November 2012. All types of ETFs except fixed-income ETFs experienced inflows from September to November.

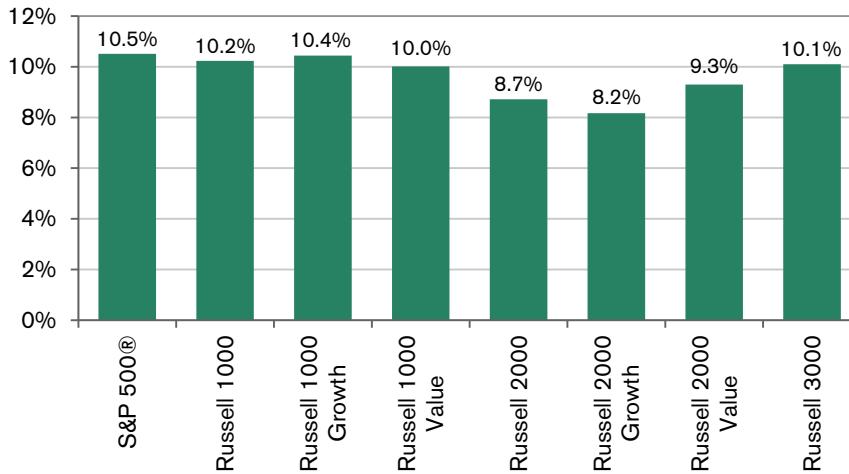

*Includes domestic equity, foreign equity, taxable bond, municipal bond and hybrid mutual funds.

Investment Performance: U.S. Equities

This section presents data and Segal Rogerscasey's commentary on U.S. equity index returns and sector performance for Q4 2013.

U.S. Equity Index Returns

The graph below illustrates Q4 2013 rates of return for selected U.S. equity indices. The table shows returns for the latest quarter, year-to-date, one-year, three-year, five-year and 10-year annualized timeframes. All data in the table are percentages.

Equity Indices	QTD	YTD	1 Year	3 Year	5 Year	10 Year

Materials	10.7	25.6
Telecommunications Services	5.5	11.5
Utilities	2.8	13.2

This table shows quarter-to-date and year-to-date price changes for each sector.

Source: Standard & Poor's

Index and Sector Performance

Q4 was another strong quarter for U.S. stocks, contributing to a momentous year-end return. The Russell 3000 Index posted a 10.1 percent return in Q4 and ended 2013 up 33.6 percent, which is its highest annual return of this century and since 1995 (36.8 percent). Performance continued to be driven by risk-seeking investors, as high beta and high volatility stocks did well. The long-awaited taper of the Fed's bond purchasing program along with Congressional compromise on the recent budget sustained the U.S. equity rally through the end of the year.

For 2013, small-cap stocks trumped large caps across styles, and growth stocks outperformed value and core in both small and large caps. All sectors within the S&P 500® Index posted positive results during Q4 and for the year. Industrials (13.5 percent), Information Technology (13.3 percent), and Consumer Discretionary (10.8 percent) were the top performers of Q4. Consumer Discretionary (43.1 percent), Healthcare (41.5 percent) and Industrials (40.7 percent) fared the best this year. Defensive sectors such as Utilities and Telecommunications Services, although positive, lagged the other sectors substantially in both QTD and YTD measures.

Investment Performance: U.S. Equities

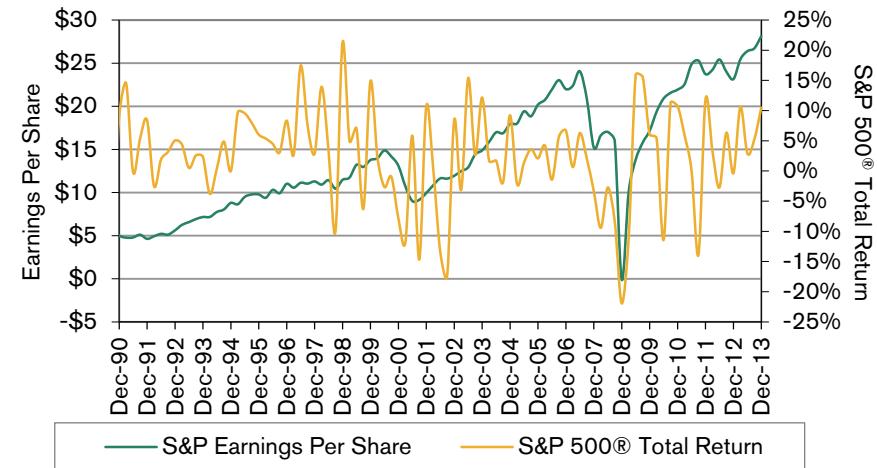

This section presents Segal Rogerscasey's commentary on U.S. equity earnings and growth- vs. value-stock performance for Q4 2013.

U.S. Equity Market Earnings and Volatility

The adjacent graph compares the total return and the earnings per share of companies in the S&P 500 Index® since September 1990. With the exception of the slight drops during Q4 2011 and the second half of 2012, earnings per share of companies in the S&P 500 Index® have been trending upward since 2008, ending Q4 2013 at \$28.14, a 10-year high. Q3 2013 earnings were revised upward to \$26.92. Current earnings remain well above those of Q4 2008, which bottomed at \$-0.09.

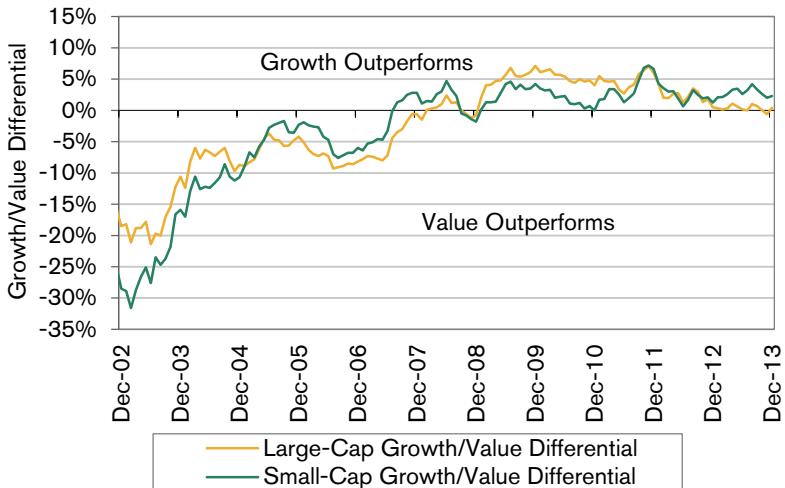

Earnings are perhaps the single most studied metric in a company's financial statements because they show a company's profitability. A company's quarterly and annual earnings are typically compared to analysts' estimates and guidance provided by the company itself. In most situations, when earnings do not meet either of those estimates, a company's stock price will tend to drop. On the other hand, when actual earnings beat estimates by a significant amount, the share price will likely surge.

S&P 500® Index: Total Return and Earnings Per Share (Quarterly)

Source: Standard & Poor's

Growth Stocks vs. Value Stocks (Rolling 3-Year)

Source: Russell Investments

Growth vs. Value

The adjacent graph depicts the growth versus value differential for both large- and small-cap stocks. The large-cap differential is composed of the Russell 1000 Growth (R1000G) versus the Russell 1000 Value (R1000V) and the small-cap differential is composed of the Russell 2000 Growth (R2000G) versus the Russell 2000 Value (R2000V).

The R1000G outpaced the R1000V for each rolling three-year period since January 2009 with the exception of the period ending July 2013, when the large-cap growth/value differential was flat, and in the period ending November 2013 (-61 bps). As of December 31, 2013, the R1000G has outperformed the R1000V on a trailing three-year (39 bps), five-year (372 bps), and 10-year (25 bps) basis.

Similar to large-cap stocks, the R2000G outpaced the R2000V for each rolling three-year period since January 2009, with the exception of the period ending December 2010, when the small-cap growth/value differential was flat. In addition, the R2000G has outpaced the R2000V on a trailing three-year (233 bps), five-year (494 bps) and 10-year (80 bps) basis.

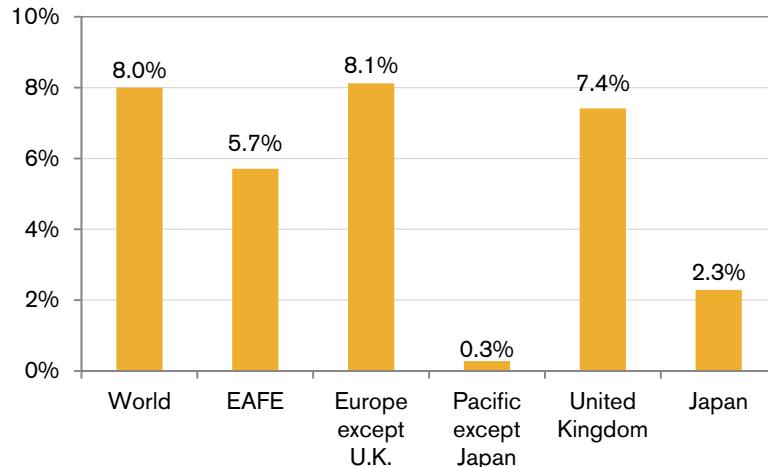

*As a reminder, 10 basis points (bps) equals 0.1 percent.

Investment Performance: Non-U.S. Equities

This section presents data and Segal Rogerscasey's commentary on international equity returns and sector performance for Q4 2013.

MSCI Non-U.S. Equity Index Returns

The graph below illustrates Q4 2013 rates of return for selected non-U.S. equity indices. The table shows returns for the latest quarter, year-to-date, one-year, three-year, five-year and 10-year annualized timeframes. All data in the table are percentages.

MSCI Indices	QTD	YTD	1 Year	3 Year	5 Year	10 Year

Materials	2.9	0.2
Telecommunications Services	10.7	40.6
Utilities	0.9	9.2

This table shows quarter-to-date and year-to-date price changes for each sector.

Source: Morgan Stanley Capital International

Index and Sector Performance

Q4 was another positive quarter for international equity, as measured by the MSCI EAFE Index (5.7 percent). Improving investor sentiment and reduced austerity measures helped boost European markets, but weak numbers from Australasia were a drag on the overall return. The MSCI EAFE, World and Europe ex U.K. indices gained on a monthly basis since September and ended 2013 at 22.78 percent, 26.68 percent, and 27.65 percent, respectively.

All of the major non-U.S. regions posted positive returns in Q4. Europe ex U.K. (8.1 percent) performed the best due to the ECB's decision to cut the lending rate, which signaled a desire for growth. With the exception of New Zealand (-4.1 percent) and Australia (-0.9 percent), all developed non-U.S. nations posted Q4 gains. Not surprisingly, the highest returns were generated by European countries, notably Germany (13.3 percent), Finland (11.8 percent) and Spain (11.4 percent).

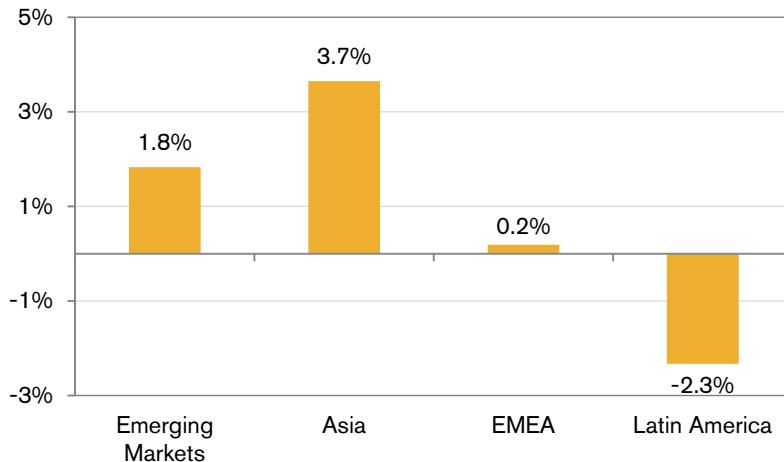

All sectors within the MSCI EAFE Index were positive in Q4. Generally, the more cyclical sectors, such as Technology (8.0 percent), Financials (5.7 percent) and Energy (5.7 percent), fared better; however, the historically defensive Telecommunication Services (10.7 percent) sector significantly outperformed the group in Q4 and for the year (40.6 percent).

Investment Performance: Emerging Market Equities

This section presents data and commentary on emerging market (EM) equity returns and sector performance for Q4 2013.

MSCI Emerging Market Equity Index Returns

The graph below illustrates Q4 2013 rates of return for selected emerging market equity indices. The table shows returns for the latest quarter, year-to-date, one-year, three-year, five-year and 10-year annualized timeframes. All data in the table are percentages.

MSCI EM Indices	QTD	YTD	1 Year	3 Year	5 Year	10 Year
Emerging Markets (All)	1.83	-2.60	-2.60	-2.06	14.79	11.17
Asia	3.65	1.98	1.98	0.57	16.01	10.42
Europe, Middle East and Africa (EMEA)	0.19	-5.16	-5.16	-2.73	13.77	9.98
Latin America	-2.33	-13.36	-13.36	-8.77	12.15	14.52

MSCI EM Sector Performance – Q4 2013

Sector	QTD (%)	YTD (%)
Consumer Discretionary	2.5	5.8
Consumer Staples	-1.6	-3.8
Energy	-2.6	-10.7
Financials	1.0	-4.2
Healthcare	4.6	9.1
Industrials	2.8	-1.0
Information Technology	7.9	14.0
Materials	2.1	-17.0
Telecommunications Services	0.0	-1.7
Utilities	4.7	-3.1

This table shows quarter-to-date and year-to-date price changes for each sector.

Source: Morgan Stanley Capital International

Index and Sector Performance

The MSCI Emerging Markets (EM) Index rose 1.8 percent in Q4, marking its second straight quarterly increase, but ended 2013 with a -2.6 percent return. Currency had a negative contribution to Q4's performance, as the MSCI EM Index increased 3.0 percent in local currency terms. Emerging markets continued to lag developed markets.

All regions within EM except for Latin America (-2.3 percent) posted gains during Q4. Asia (3.7 percent) was the only region to materially increase, as EMEA (0.2 percent) was relatively unchanged. Egypt (19.4 percent) and India (10.3 percent) were the top performing EM countries in Q4. Egypt's strong performance was due to monetary and fiscal policy actions taken to spur economic growth despite double-digit inflation. Colombia (-11.1 percent) was the worst performer in Latin America and of the broader index. Despite strong Q3 GDP growth, Colombia experienced numerous Marxist rebel attacks on the country's energy infrastructure during peace negotiations, which worried many investors.

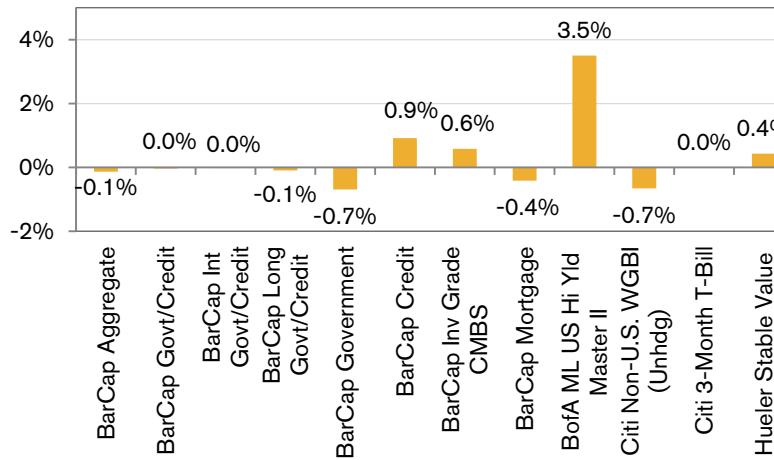

There was no discernable trend between the performance of cyclical sectors and defensive sectors. Information Technology (7.9 percent), Utilities (4.7 percent) and Healthcare (4.6 percent) had the strongest returns. Only two sectors, Energy (-2.6 percent) and Consumer Staples (-1.6 percent), fell in Q4. Three sectors posted gains for the year: Consumer Discretionary (5.8 percent), Healthcare (9.1 percent) and Information Technology (14.0 percent).

Investment Performance: U.S. Fixed Income

This section presents select U.S. fixed-income index data along with commentary on option-adjusted spreads (OAS) during Q4 2013.

U.S. Fixed Income Index Returns

The graph below illustrates Q4 2013 rates of return for selected U.S. fixed-income indices. The table shows returns for the latest quarter, year-to-date, one-year, three-year, five-year and 10-year annualized timeframes. All data in the table are percentages.

Source: Barclays Capital

Option-Adjusted Spreads

Most fixed income sectors delivered negative returns due to rising interest rates, but longer-duration securities fared the worst. Although spreads tightened modestly across fixed income sectors, it was not enough to offset the impact of higher yields. The spreads on commercial mortgages tightened by 15 bps, while the spreads on agency pass-throughs and asset-backed securities both tightened by 9 bps.

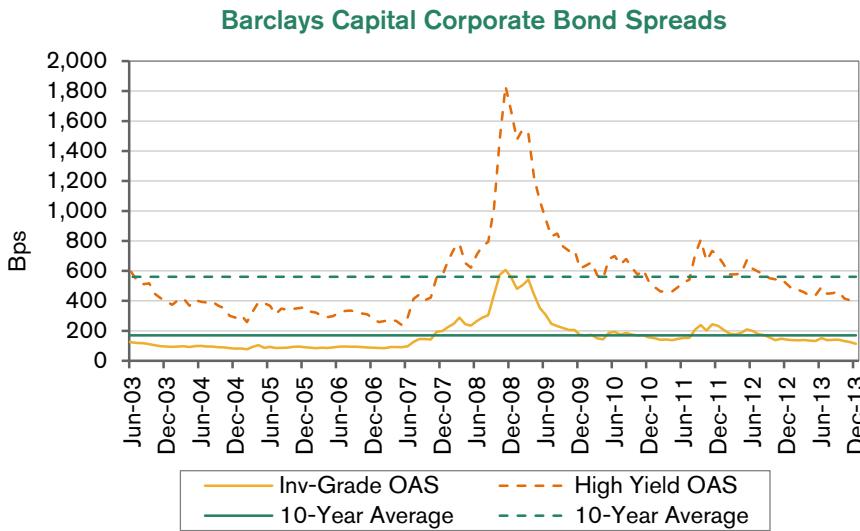

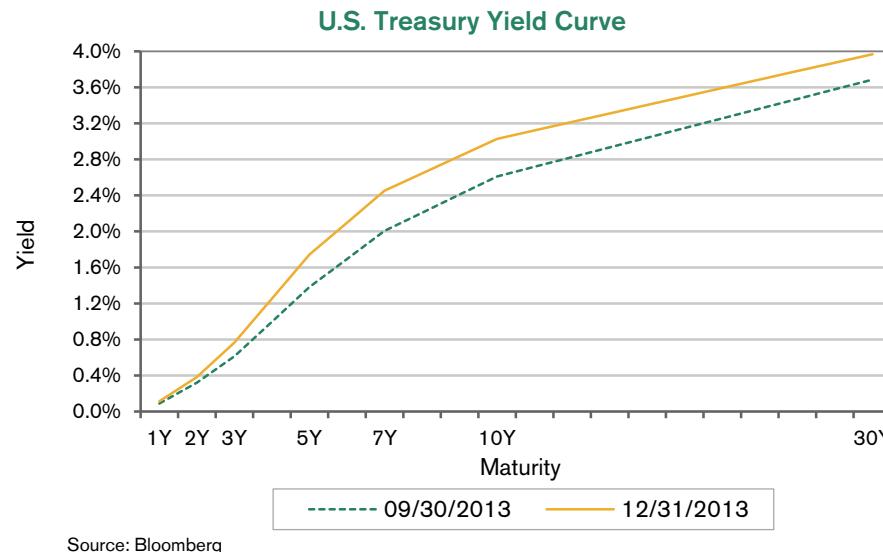

Within agency mortgages, lower coupon securities underperformed higher coupon securities in response to the Fed's tapering announcement. The Fed purchases lower coupon issues as part of its quantitative easing program and investors feared that the tapering and the eventual end of the Fed's support would adversely affect the technicals for the lower coupon issues.

Investment Performance: U.S. Fixed Income

This section presents commentary on the U.S. Treasury yield curve and credit spreads during Q4 2013.

Yield Curve

On December 18, 2013, the Fed announced a \$10 billion reduction of its bond-buying program. The Fed will decrease the amount of monthly Treasury and Agency mortgages by \$5 billion each, reducing the rate of total purchases to \$75 billion per month. The Fed's announcement, coupled with stronger economic data, led to a rise in rates excepting shorter-term rates, which remained anchored to the Fed policy rate. The 10-year U.S. Treasury climbed to 3.03 percent in December 2013, the highest level in over two years.

Credit Spreads

Investment-grade corporate spreads tightened by 27 bps during Q4, ending the quarter with an option-adjusted spread of 114 bps over Treasuries, as shown in the adjacent graph. Riskier credit-sensitive classes, such as high yield, corporate bonds, and leverage loans, outperformed Treasuries, as investors viewed the Fed's taper decision as a sign of improving economic conditions.

High yield bond prices moved higher due to favorable U.S. economic data and reassurance from the Fed that monetary policy support would continue. Spreads narrowed by 79 bps and finished at 382 bps over Treasuries. Credit risk remained low compared to historic levels as high yield issuers continued to push out maturities through refinancing.

Investment Performance: Non-U.S. Fixed Income

This page focuses on international fixed-income asset class data and information on EM debt (EMD) for Q4 2013.

International Fixed Income

In Q4, global sovereign bonds, as measured by the Citigroup World Government Bond Index (WGBI), gained 0.1 percent in local currency terms, but fell 1.1 percent in unhedged terms. The BarCap Global Aggregate Index, which includes spread sectors, fell 0.4 percent, outperforming the sovereign-only Citigroup WGBI Index by roughly 70 bps on an unhedged basis. Non-U.S. government bonds, as measured by the Citigroup Non-U.S. WGBI, outperformed U.S. government bonds by roughly 120 bps in local currency terms, but underperformed by 50 bps in unhedged currency terms. On an unhedged basis, Japan (-6.5 percent) and Australia (-4.7 percent) were once again the worst performers on the back of weak currencies. The Australian dollar resumed its slide, as investors continued to be concerned about the country's exposure to commodity exports, particularly with China. The Japanese yen also came under pressure, as the BoJ maintained its aggressive quantitative easing plan aimed at stamping out deflation.

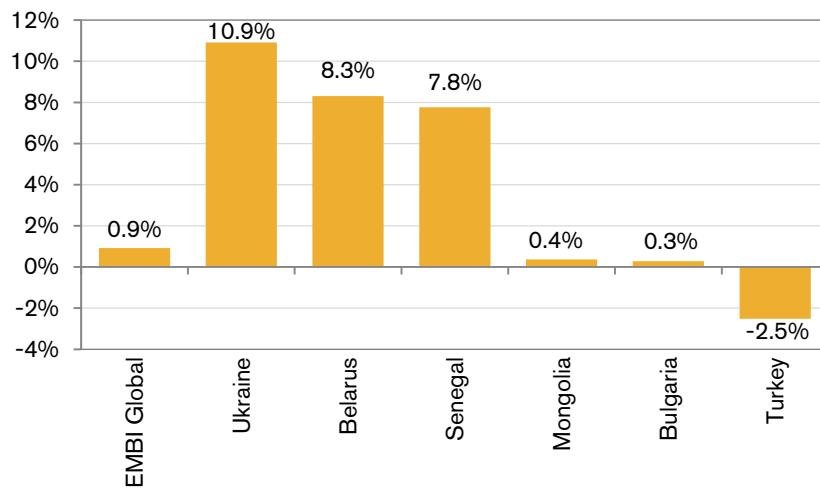

In Europe, subdued inflation pressures led the ECB to cut its benchmark rate from 50 bps to a record low 25 bps. The best performers on an unhedged basis were Italy (5.6 percent) and Spain (3.8 percent), which benefited both from the euro strengthening and spreads tightening. Peripheral European countries outperformed Germany (1.1 percent) and other core European countries in Q4.

Citigroup WGBI: Returns of Major Constituents (%)

Country	Local Currency Return (Qtr)	Currency Effect	Unhedged Total Return (Qtr)
United States	-0.7	-	-0.7
Canada	-0.2	-3.3	-3.5
Australia	-0.4	-4.3	-4.7
Japan	0.2	-6.6	-6.5
Austria	-0.1	1.8	1.7
Belgium	1.1	1.8	2.9
France	0.3	1.8	2.1
Germany	-0.7	1.8	1.1
Italy	3.7	1.8	5.6
Netherlands	0.0	1.8	1.8
Spain	1.9	1.8	3.8
United Kingdom	-1.4	2.3	0.8
Non-U.S. Govt. Bond	0.5	-1.7	-1.2
World Govt. Bond	0.1	-1.2	-1.1

J.P. Morgan EMBI Global Index Best and Worst-Performing Markets

Source: J.P. Morgan

Emerging Market Debt

In Q4, emerging markets debt (EMD) posted mixed results. Dollar-denominated indices posted positive returns, as narrowing spreads more than offset the negative impact from the higher rates on U.S. Treasuries. The JPMorgan EMBI Global Index (hard dollar sovereigns) and CEMBI Broad Diversified Index (corporates) gained 0.9 percent and 2.0 percent, respectively.

Within the JPMorgan EMBI Global Index, high beta issuers such as Ukraine (10.9 percent), Belarus (8.3 percent) and Senegal (7.8 percent) were the best performers. Ukraine, a sovereign that was beaten down earlier in the year, rose on the back of funding secured from Russia. Turkey (-2.5 percent), which suffers from a large current account deficit and political turmoil, fell in Q4.

By contrast to dollar-denominated indices, local benchmarks experienced modest drawdowns primarily as a result of the currency effect. The Indonesian rupiyah, Turkish lira, and Brazilian real were significant detractors on the currency side during Q4. The GBI-EM Global Diversified Index (local issues) registered a loss (-1.5 percent).

Investment Performance: Commodities and Currencies

This section presents performance information about commodities and major world currencies as of Q4 2013.

Commodities

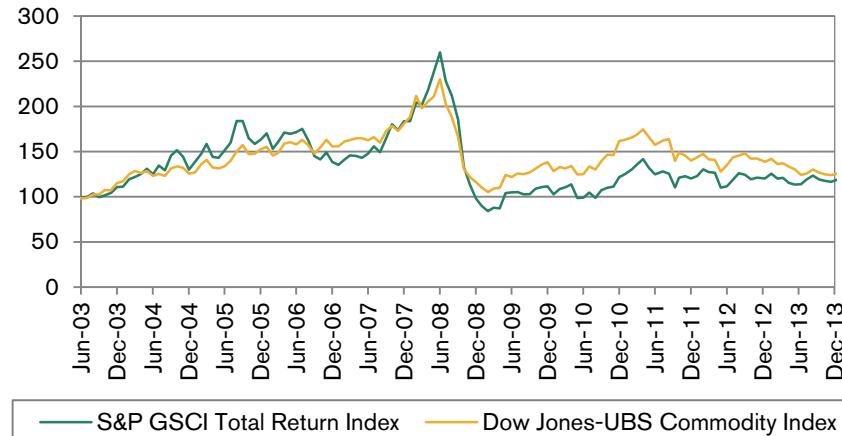

After staging a comeback in Q3, commodities once again faltered in Q4. Performance for the year was weak especially when compared to the rallying equity markets. While both the primary commodity indices were in negative territory for the year, the S&P GSCI (-1.22 percent) outperformed the DJ-UBS (-9.53 percent) due to a higher allocation to energy and lower allocation to agriculture and precious metals, which were the best and worst performers, respectively. In particular, natural gas made significant gains during 2013, while corn and silver prices fell more than 40 percent and 35 percent, respectively. This was the worst year for corn since 1970, as record amounts of corn production and other crops outpaced demand for food, livestock feed and biofuels. Additionally, other precious metals also suffered during 2013. Gold (-28 percent) posted its worst yearly return since 1981.

The adjacent graph shows the major commodity indices, the S&P GSCI* Index and the Dow Jones-UBS Commodity Index**

* The S&P GSCI Index is calculated primarily on a world production-weighted basis and is composed of the principal physical commodities that are the subject of active, liquid futures markets.

** The DJ-UBSCI is composed of futures contracts on physical commodities, with weighting restrictions on individual commodities and commodity groups to promote diversification.

**Monthly Commodity Returns, Growth of \$100:
June 2003 – December 2013**

Nominal Broad Dollar Index: USD vs. Basket of Major Trading Partners

Sources: Federal Reserve and Bloomberg

Currencies

The adjacent graph shows the U.S. dollar (USD) against a basket of 16 major market currencies, including those listed in the table below: the Canadian dollar (CAD), the euro (EUR), the Japanese yen (JPY), the Swiss franc (CHF), and the British pound-sterling (GBP).

In Q4, the U.S. nominal broad dollar modestly strengthened by 0.10 percent. The USD should benefit throughout 2014 as the Fed reduces quantitative easing. The JPY's weak performance against the USD was largely affected by the BoJ's massive quantitative easing program and the Japanese government's aggressive fiscal policies.

USD Major Trading Partners	Pairs	Q4 Level	YTD (%)	5-Year Average
Canada	USD/CAD	1.0623	7.08%	1.0388
Eurozone	USD/EUR	0.7277	-4.00%	0.7442
Japan	USD/JPY	105.31	21.39%	87.6758
Switzerland	USD/CHF	0.8929	-2.46%	0.9721
U.K.	USD/GBP	0.604	-1.85%	0.6351

Investment Performance: Hedge Funds

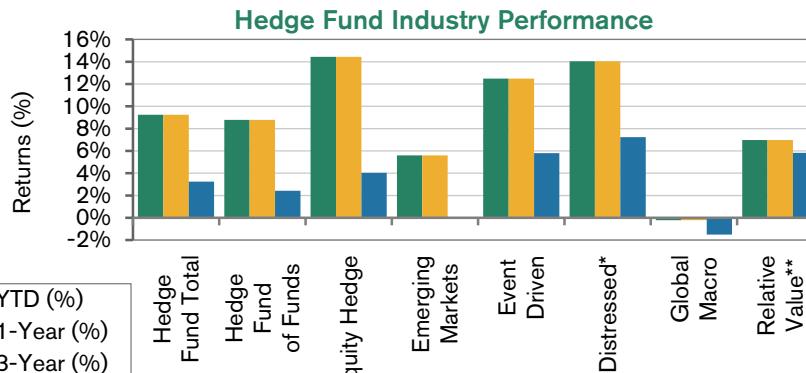

This section provides an overview of hedge fund results along with an analysis of strategy performance during Q4 2013.

Hedge Fund Overview

The Hedge Fund Research, Inc. (HFRI) Fund Weighted Composite Index gained 3.6 percent in Q4, bringing the 2013 return to 9.2 percent. Hedge funds recorded profits in all three months of Q4. All of the major hedge fund strategies posted positive performance, but Equity Hedge (4.8 percent) and Event-Driven (3.8 percent) generated the greatest returns. Global Macro (2.0 percent) continued to lag.

Longer-term results are positive, with hedge funds recording a gain of 4.0 percent over the three-year period ending December 31, 2013, as measured by the HFRI Fund Weighted Composite Index.

Hedge funds of funds also gained in Q4, as represented by the HFRI Fund of Funds (FOF) Composite Index's 3.5 percent increase. The HFRI FOF: Conservative Index underperformed this broader index with a 2.7 percent return while the HFRI FOF: Diversified Index gained 3.6 percent.

* Distressed funds focus on companies that are close to or in bankruptcy.

**Relative-value funds focus on arbitrage opportunities between equity and fixed income securities.

Source: Hedge Fund Research, Inc.

The HFRI Global Macro Index rose 2.0 percent. Positive performance came from both discretionary and systematic macro managers. Profitable trades included long positions in equity indices, EMD and currency trading, while negative factors included primarily long positions in commodity trading.

Strategy Analysis

The HFRI Equity Hedge Index gained 4.8 percent in Q4. As equity markets advanced, managers generated positive performance on the long side of their portfolios stemming from idiosyncratic names, including positions that benefited from better-than-expected earnings results. Gains spanned multiple sectors, such as Healthcare, Technology and Industrials, as well as several regions, including China, Europe, Japan and the U.S. On the other hand, managers were hurt primarily on the short side as many positions traded higher on the back of rising markets.

The HFRI Event-Driven Index rose 3.8 percent. Positive performance came from both equity-event managers as well as credit managers. Gains came in the form of M&A related and post-reorganization equity positions as well as credit securities, including high yield, distressed and structured credit positions (RMBS and ABS). Profits on the long side of managers' portfolios were generally offset by losses from short equity positions and index hedges.

The HFRI Emerging Markets Index gained 3.6 percent. Positive performance came from Asian equity positions, particularly in companies benefiting from local consumption. China was particularly strong on the equity side, while managers struggled to generate performance in Latin America, recording losses from equities and currencies. Eastern Europe and Russia also presented opportunities in rates and FX, while South Africa struggled with labor unrest.

The HFRI Relative Value Index increased 2.3 percent in Q4. Relative Value managers saw positive performance from equity-related trades in the U.S. and Europe, capital structure arbitrage and corporate credit. The convertible bond market saw strong issuance, which aided results; however, portfolio hedges and negative alpha generation offset gains in certain commodity-related positions.

Investment Performance: Private Equity

This section provides data on private equity industry performance, fundraising, buyout funds, initial public offering (IPO) activity and venture capital. The information in this section reflects the most recent private equity data available.

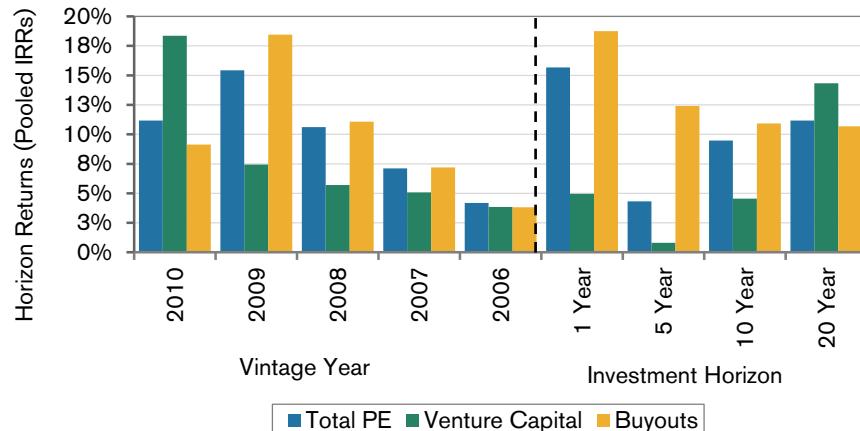

Private Equity Industry Performance

The adjacent graph shows private equity fund performance as of Q2 2013, calculated as pooled internal rates of return (IRRs) of funds reporting to Thomson One. Performance for 2006 through 2010 vintage-year funds, as well as one-, five-, 10- and 20-year returns is calculated for funds in the following categories: all private equity, venture capital and buyouts. While venture and buyout strategies are posting positive returns for these vintage years, buyouts have outperformed venture funds with the exception of the 2010 and 2006 vintage years.

Private equity funds for all regions returned approximately 3.43 percent in Q2 2013. This includes performance across all venture capital (seed/early, later and balanced stages) and buyout funds (small, medium, large, mega and generalist). Over a 20-year period, all private equity, venture capital and buyout funds generated double-digit returns, returning 11.2 percent, 14.3 percent and 10.7 percent, respectively.

*"Vintage year" refers to the first year capital was committed in a particular fund. Vintage-year performance is calculated as the median percentile returns of all funds reporting as pooled IRRs.

Private Equity Performance by Vintage Year and Investment Horizon: All Regions

Source: Thomson Reuters

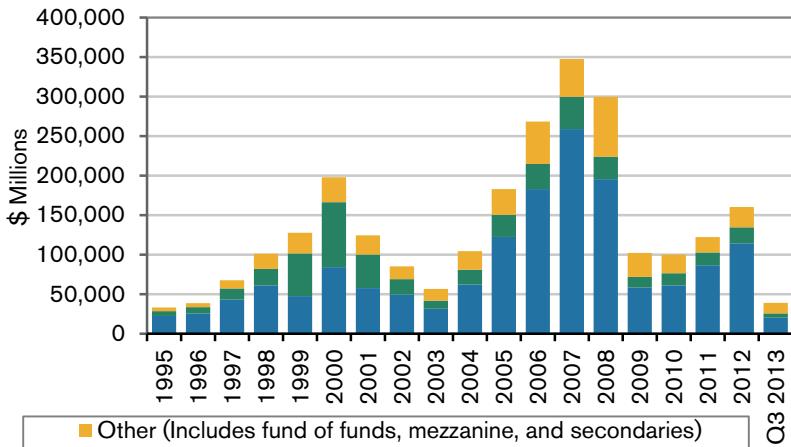

Private Equity Overview

According to *Preqin*, fundraising was strong in Q3 2013 with private equity firms in the U.S. raising \$39.0 billion, up 59 percent from the same period in 2012. Despite the increase, fundraising remains substantially lower than the pre-financial crisis levels, which peaked at an annual level of \$350 billion in 2007, as shown in the adjacent graph.

Buyout funds raised \$20.2 billion during Q2, marking a 28 percent decline from the \$25.9 billion raised during Q1. Venture capital and growth funds raised \$5.5 billion across 36 funds. Mezzanine and secondary strategies raised \$5.1 billion and \$6.3 billion, respectively. Venture-backed IPO activity was stronger in Q3, as 26 venture-backed IPOs raised \$2.7 billion, representing a 13 percent increase in volume and 11 percent increase by dollars. This marks the first consecutive quarter to see 20 or more venture-backed IPOs since 2004. There were 107 venture-backed M&A deals, up from 92 in Q2, of which 31 had a disclosed aggregate value of \$4.9 billion, a 45 percent increase from Q2. By deal volume, buyout activity decreased slightly with 113 completed deals in Q3 versus 119 in Q2, but the aggregate value of those deals increased significantly from \$10.4 billion to \$21.1 billion.

Venture capital firms invested \$7.8 billion in 1,005 deals during Q3, a slight increase from Q2 in terms of deal volume and dollars. Meanwhile, buyout deal activity, which has been sluggish, saw an uptick from Q2, as firms completed 441 transactions with a disclosed value of \$46.5 billion. The \$6 billion secondary buyout of Neiman Marcus was the largest deal completed in the quarter.

Investment Performance: Real Estate

This page presents data and Segal Rogerscasey's commentary on private and public real estate. The information below reflects the most recent data available.

Private Real Estate

The National Council of Real Estate Investment Fiduciaries (NCREIF) Property Index (NPI), which tracks private real estate in the U.S., gained 2.5 percent during Q4. The total return is composed of 1.3 percent income and 1.2 percent property-level appreciation. Over the trailing one-year period, the Index gained 11.0 percent, composed of 5.2 percent property-level appreciation and 5.6 percent income.

In the regions of the U.S., the South performed the best during Q4 and over the last 12 months, as shown in the adjacent table.

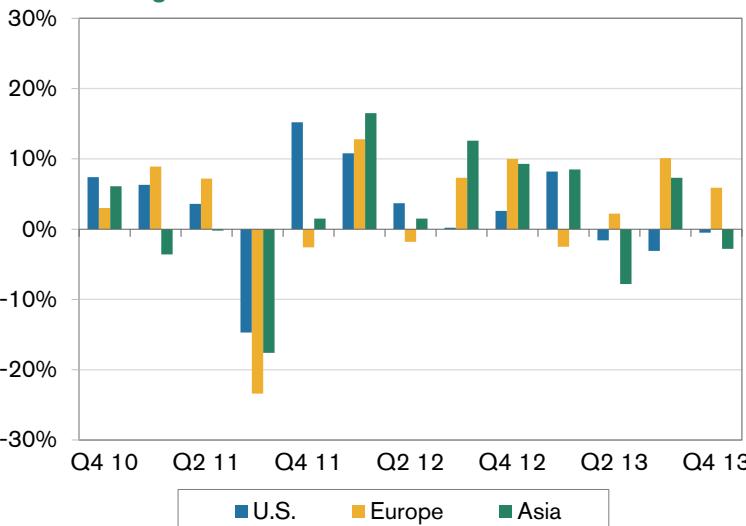

Operating fundamentals continued to improve and shorter-lease-term sectors such as apartments, hotels and storage have generated the strongest operating performance, although the pace of their growth is slowing. High-quality asset values have slightly exceeded peak (2007) levels, while the recovery of secondary asset values has significantly lagged. New supply is increasing in select markets with strong fundamentals; however, with the exception of the apartment sector, the pace is slower than usual.

National Property Index Sector and Region Performance

	Returns as of Q4 2013		
	Ending Weight (%)	QTD (%)	1 Year (%)

Public Real Estate

The FTSE EPRA/NAREIT Global Developed Real Estate Index total market capitalization remained stable at \$1.1 trillion in Q4, broken down as follows: North America \$536 billion, Europe \$162 billion and Asia \$368 billion. Economic strength in the U.K. partially offset concerns over higher interest rates in the U.S. and resulted in a 0.5 percent decline on a global basis in Q4. Europe (5.9 percent) outperformed the U.S. (-0.7 percent) and Asia (-2.8 percent) as measured by the FTSE EPRA/NAREIT indices. Sector performance in the U.S. was mixed: Lodging (8.3 percent), Manufactured Home Communities (4.6 percent), Regional Malls (2.9 percent), Diversified/Financial (2.5 percent), Central Business District Office (1.7 percent) and Suburban Office (1.3 percent) outperformed the broader index, while Healthcare (-7.5 percent), Self Storage (-6.5 percent), Student Apartments (-5.0 percent), Apartments (-2.8 percent) and Specialty Office (-2.4 percent) underperformed.

Property stocks in Europe benefited from stronger economic data in the U.K., but Asia was hurt by the release of weaker economic data and concerns over higher U.S. interest rates. In Europe, Austria (17.0 percent), Greece (10.7 percent), the U.K. (9.4 percent), Italy (9.3 percent) and Sweden (9.1 percent) outperformed in Q4, while Norway (-9.3 percent), Finland (-2.8 percent), Switzerland (-0.6 percent), Germany (1.1 percent) and the Netherlands (3.9 percent) lagged. In Asia, New Zealand (1.2 percent), Japan (0.5 percent) and Singapore (-2.3 percent) outperformed while Australia (-6.2 percent) and Hong Kong (-6.1 percent) lagged the region as a whole.

Investment Performance: Real Estate

This page presents data and Segal Rogerscasey's commentary on value-added and opportunistic real estate. The information in this section reflects the most recent data available.

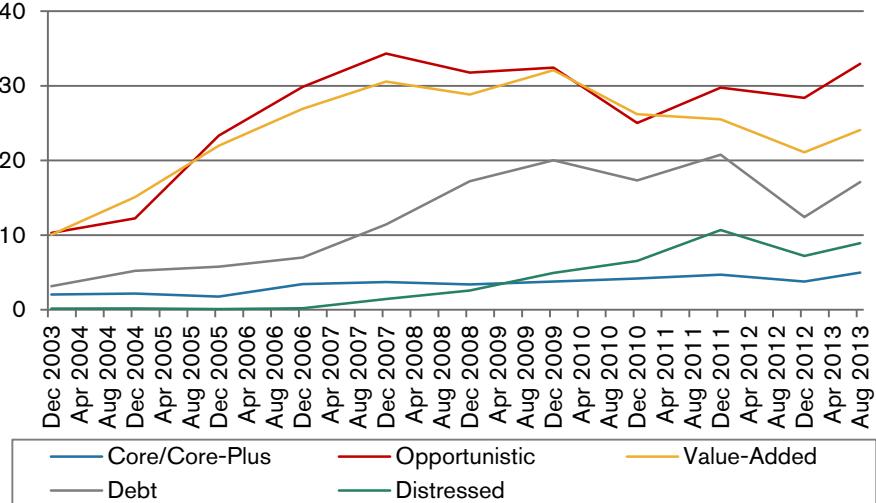

Value-Added and Opportunistic Real Estate

U.S. private real estate fundraising continues to improve and assets under management are at an all-time high. Fund managers have been able to identify attractive opportunities in which to invest and have been able to exit their investments and return capital as well which is supporting fundraising as investors are able to redeploy this capital. As illustrated in the two graphs below, the annual average global closed-end private real estate fund size reached an all-time high of \$511 million in 2013 with the higher risk/return profile opportunistic and value-added strategies raising the majority of capital. There were 54 opportunistic fund closings and 50 value-added fund closings, which raised \$35 billion and \$16 billion, respectively, representing more than 60 percent of the global closed-end private real estate capital raised in 2013.

As seen in the graph to the right, in December 2012, "dry powder"** fell to \$79 billion, its lowest level since 2006, but grew to \$98 billion in August 2013. U.S.-focused closed-end private opportunistic and value-added strategies represented almost 60 percent of dry powder with their individual levels reaching \$33 billion and \$24 billion, respectively.

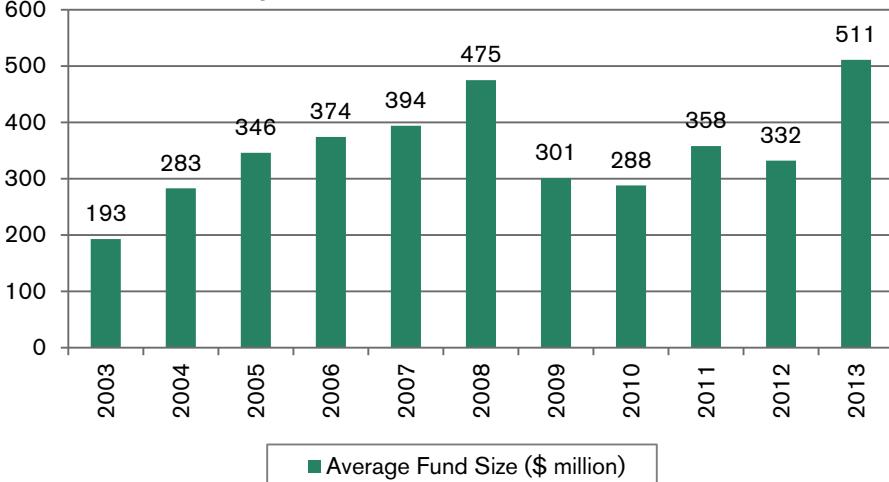

* "Dry powder" is the amount of capital that has been committed for investment to private real estate funds by limited partners (*i.e.*, investors) but has not been called for investment by general partners (*i.e.*, investment managers).

Noteworthy Developments

Segal Rogerscasey finds the developments discussed in this section to be noteworthy for investors.

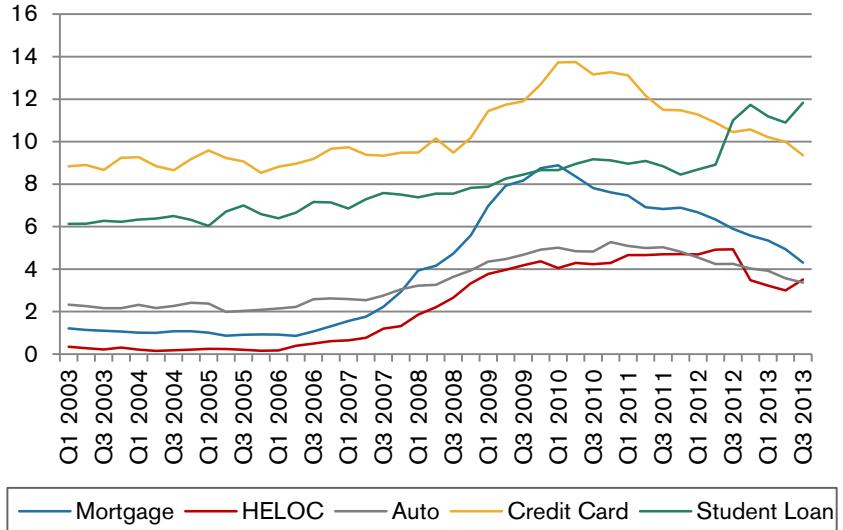

Rising Student Loan and Home Equity Line of Credit Delinquency Rates Present Potential Headwinds for Economic Growth

The adjacent chart displays the percentage of household debt over 90 days delinquent by the five major loan types comprising the household debt balance. While most delinquency rates have declined, indicating that consumers may have learned the hard lessons of the recession and redoubled their efforts to keep debt at manageable levels, student loan and home equity line of credit (HELOC) delinquency rates have increased and may be potential impediments to a recovering economy.

The continued decline in mortgage, credit card and auto loan delinquency rates—bolstered by rising home prices, the subsistence of low interest rates and steady job growth—indicate more prudent debt management on behalf of the consumer and are positive signs for a healthy economy.

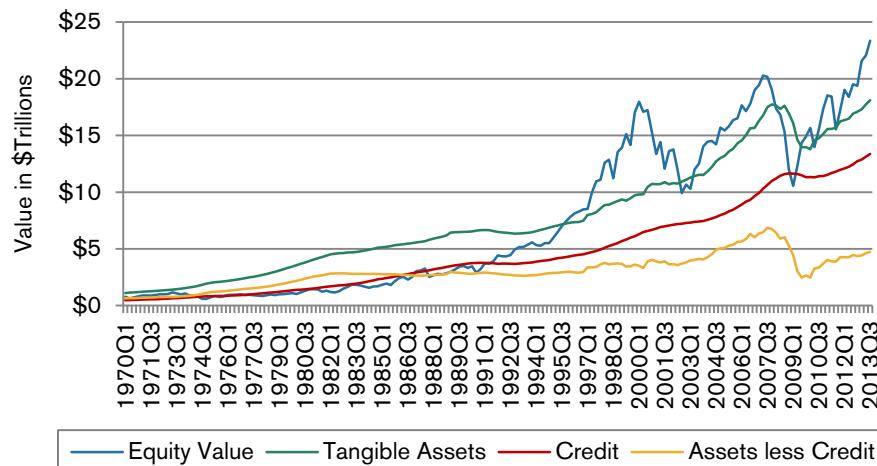

Concurrently, the increasing percentage of student debt loans more than 90 days delinquent, combined with a growing outstanding student debt balance that recently surpassed the \$1 trillion threshold, presents a headwind for economic growth, as those with heavy student debt and decreased access to credit are more likely to delay purchases of a home or a car. The recent uptick in delinquencies on HELOCs, which comprise 5 percent of the debt balance, may also pose a risk going forward. U.S. borrowers are increasingly missing payments on HELOCs they took out during the housing bubble as interest-only introductory periods expire and principal repayment begins. This trend could deal another blow to U.S. banks and the broader economy.

Percent of Household Debt 90+ Days Delinquent by Loan Type

Corporate Balance Sheets

Sources: The Market Ticker, FedZ1

Comparing Equity Values to Corporate Balance Sheets

The fact that corporate debt is at record levels, presumably the result of cheap money, has received nowhere as much attention as corporate cash. As a stockholder, one should be concerned with a company's ability to produce goods and not just with the cash on hand or current earnings. Thus, when comparing equity values to corporate balance sheet items, it is more relevant to do so to assets less credit. The ratio (of equity value to assets less credit), on the order of five as of the end of the Q3, is quickly approaching a level last seen just before the 2000 market correction. Another high for equity values and this ratio was attained in 2007. In both cases, the result was a market correction of about 50 percent. So, is this time different? Unlikely.

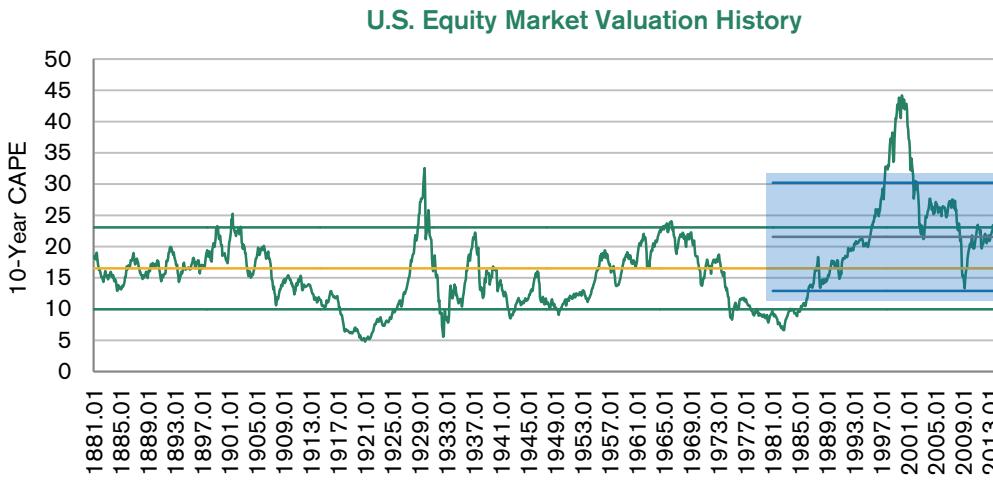

A possible contributing factor to the continuing rise in equity values may be the retail investors' favorable sentiment fed by increasing equity markets. Although mutual fund assets have not returned to pre-crisis levels, the cheaper and more indiscriminate ETFs have attracted record levels of assets.

Noteworthy Developments

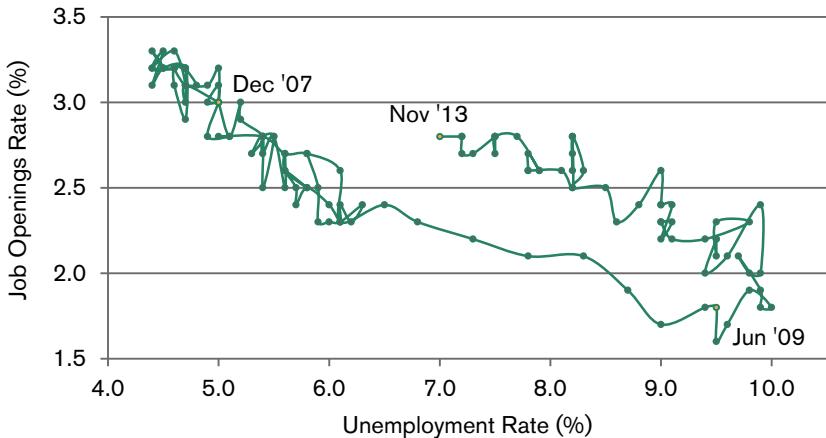

Segal Rogerscasey finds the developments discussed in this section to be noteworthy for investors.

U.S. Equity Market Valuation History

The adjacent chart compares Professor Robert Shiller's cyclically adjusted price/earnings (CAPE) for the S&P 500® over its full history from 1871 to 2013, and highlights a more recent period, beginning in 1981 (blue shaded area). As can be seen, at 25.4x as of December 2013, the CAPE is above the normal range of valuation, indicating that the S&P 500® valuation was over-valued relative to history by this measure. However, when viewed within the more recent history, valuation is within the normal range. The recent history includes the extraordinarily high valuation of the technology bubble, but also includes a secular trend toward lower inflation, which peaked in the 1980-81 period. Lower inflation generally supports a higher valuation. With U.S. monetary policy targeting a higher rate of inflation, the secular trend toward lower inflation – a key support for the recently higher valuation – is at risk.

Job Openings vs. Unemployment Rate

Source: Bureau of Labor Statistics

Rising Economy and Improving Labor Markets

The Beveridge curve, illustrated in the adjacent chart, shows the relationship between unemployment and the vacancy rate since 2003. During an economic expansion, the unemployment rate is low and the job openings rate is high. Conversely, during a contraction, the unemployment rate is high and the job openings rate is low.

From December 2007 to June 2009, each data point moved lower and further to the right, indicating a recessionary period. From 2010 to November 2013, the line shifted as job openings increased and unemployment decreased, indicating an expansionary period. As of November 2013, the job openings rate was 2.8 percent and the unemployment rate was 7.0 percent. The last time the job openings rate was 2.8 percent was when it corresponded with a 5.4 percent unemployment rate in May 2008. The curve indicates that while labor markets are becoming more efficient, a sizeable gap still exists between the current unemployment rate and the unemployment rate previously observed at the same level of the job openings rate.

American Century Mid Cap Value

Fund Information

Fund Name :	American Century Capital Portfolios, Inc: Mid Cap Value Fund; Class A Shares	Portfolio Assets :	\$4,807 Million
Fund Family :	American Century Investment Mgmt Inc	Portfolio Manager :	Team Managed
Ticker :	ACLAX	PM Tenure :	
Inception Date :	01/13/2005	Fund Style :	IM U.S. Mid Cap Value Equity (MF)
Fund Assets :	\$744 Million	Style Benchmark :	Russell Midcap Value Index

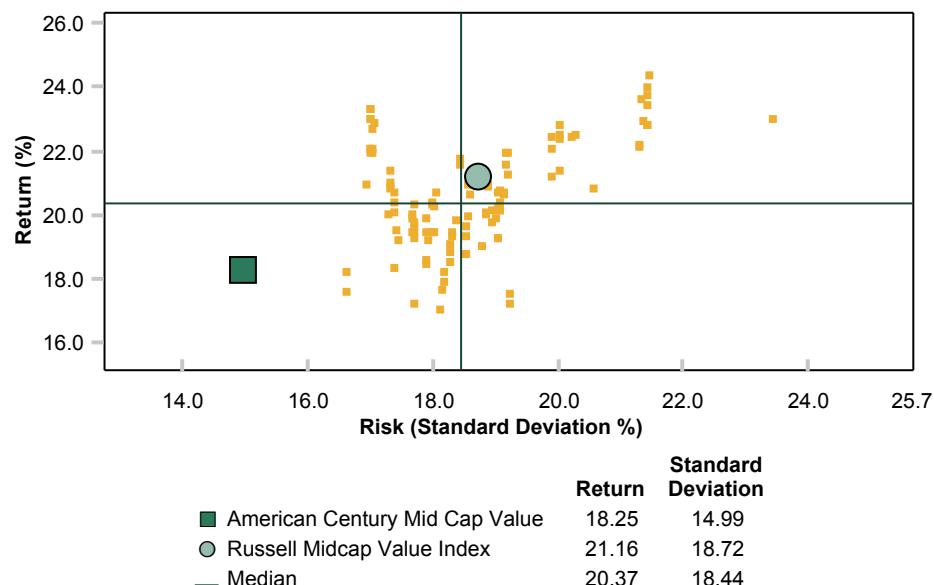

Fund Investment Policy

The Fund seeks long-term capital growth. Income is a secondary objective. Under normal market conditions, the Fund will invest at least 80% of its assets in medium size companies. In selecting stocks for the Fund, the portfolio managers look for companies whose stock price may not reflect the company's value.

Fund Information

Fund Name : Royce Fund: Royce Opportunity Fund; Institutional Class Shares
 Fund Family : Royce & Associates LLC
 Ticker : ROFIX
 Inception Date : 12/12/2001
 Fund Assets : \$804 Million
 Portfolio Turnover : 34%

Portfolio Assets : \$2,445 Million
 Portfolio Manager : Zaino/Hench
 PM Tenure : 2001–2004
 Fund Style : IM U.S. Small Cap Value Equity (MF)
 Style Benchmark : Russell 2000 Value Index

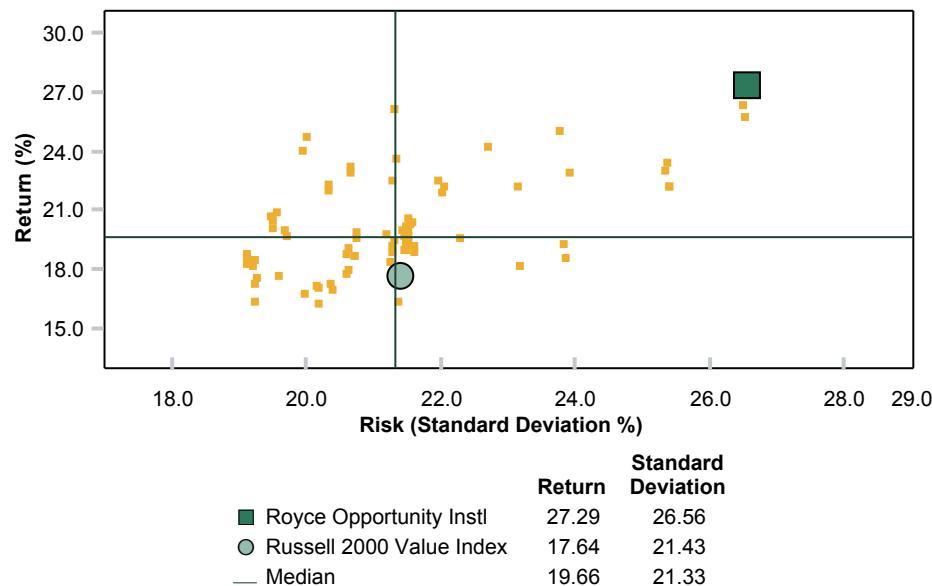

Fund Investment Policy

The Fund seeks long-term growth of capital. The Fund invests primarily in the equity securities of small-cap and micro-cap companies in an attempt to take advantage of what it believes are opportunistic situations for undervalued securities. Normally, the Fund invests at least 65% of its net assets in equity securities.
