## **Market Overview**

*Life is very short, and there's no time  
For fussing and fighting, my friend.  
I have always thought that it's a crime,  
So I will ask you once again.  
Try to see it my way,  
Only time will tell if I am right or I am wrong.  
While you see it your way  
There's a chance that we may fall apart before too long.  
We can work it out,  
We can work it out. ~ The Beatles*

After facing significant headwinds throughout 2022, capital markets carried their renewed optimism into the second quarter of 2023. Although markets ended in positive territory, they experienced some bumpiness along the way. Market participants continually evaluated economic data and prognosticated as to their effect on the Federal Reserve's battle against inflation via interest rates hikes. Concurrently, the United States Congress wrestled with increasing the debt ceiling or facing potentially catastrophic ramifications should a deal not get done. Throughout the negotiation, markets expected that a deal would still likely be completed in time, but as time progressed, yields increased, indicating there was a chance that lawmakers would fail to find common ground.

The good news is that in the end, politicians were able to reach a deal and stabilize U.S. debt over the next few years; however, the situation highlighted the polarization of the current political environment. Throughout the past two years, we have been reminded that investors cannot simply focus on the idiosyncratic risks of a specific investment but must also consider the broader framework in which it operates, including macroeconomic and geopolitical environments.

### Federal Reserve Monetary Policy

The Federal Reserve took a pause in June following ten consecutive rate hikes dating back to March of 2022, including 75 basis points in 2023. The Federal Funds rate at quarter end was between a range of 5.00% - 5.25%. The curve remained inverted with 2-year yield at 4.87% and 10-year yield at 3.81%. While it is true that the U.S. Treasury curve inverted before each and every one of the ten recessions since 1955, there have also been instances where the curve inverted that was not followed by a recession. Additionally, in those ten recessions, the magnitude of the inversion was not predictive to the depth and duration of the subsequent recession. And lastly, while not intuitive, stock market performance is not particularly correlated with current economic activity.

### Fixed Income

Interest rates modestly increased across the curve which led to negative returns in the second quarter. Credit spreads narrowed during the quarter across investment-grade and high yield, providing corporate credit modest outperformance over like-maturity government bonds. A strong labor market with low unemployment provided strong returns from consumer-related securitized bonds including residential mortgages, auto loans and credit card debt.

### Equities

The S&P 500 continued to advance, rising 9% in the second quarter and 17% year-to-date. Although the market was broadly positive, the advancement was concentrated in only three sectors (consumer discretionary, communications and information technology), while the remaining eight have declined or remained flat in the first half of 2023. In 2022, value stocks outperformed growth stocks by 22%. So far in 2023, the opposite is true, where growth stocks have outpaced value stocks by 24%. If year-to-date stock market performance is any indication of whether we're heading towards a recession, market participants seem to believe it would be relatively mild and companies will be able to maintain their handsome profit margins through structural technological advancements.

International stocks also advanced, albeit at a lower rate than their U.S. counterparts. Japanese and Latin American stocks have fared relatively well, while European stocks inched higher. Notably, Chinese stocks fell 10% as its economy wrestled with global economies shifting their supply chains back onshore and to cheaper emerging economies.

## ***Executive Summary***

# Kansas Board of Regents Voluntary Retirement Plan

Fall 2023 RPC Meeting

## Watch List as of Fall 2023 RPC Meeting

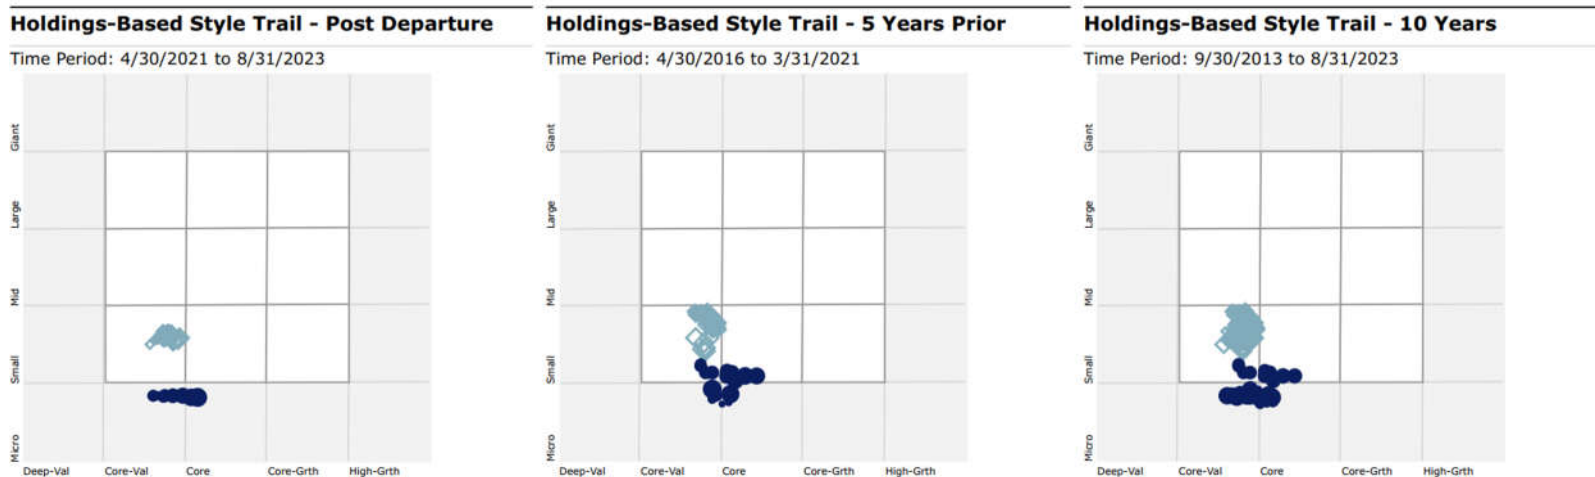

Plan	Fund Name	Reason	RPC Meeting Added
TIAA	Royce Small-Cap Opportunity Instl	Departure of entire management team for competitor firm in April 2021	Fall 2021
	Allspring Growth Inst	Long-term risk-adjusted performance in bottom quartile of peer group	Fall 2022
	TIAA-CREF Mid-Cap Growth Instl	Manager departure, near-term performance and long-term performance relative to peers	Fall 2022
Voya	None – several funds replaced during the Spring 2023 RPC Meeting	-	-

## TIAA Watch List Review

- **Royce Small-Cap Opportunity Institutional (Small Cap Value Option) (Plan assets in fund = \$541K or 0.6% of TIAA Assets and 249 participants)**
  - Rationale for being placed on Watch at Fall 2021 RPC Meeting:
    - Management Change: On April 20, 2021, all three named managers on this strategy as well as the strategy’s dedicated research analyst resigned and departed the firm for competitor First Eagle. Royce was forced to recall former lead manager Boniface “Buzz” Zaino to lead the fund on an interim basis. Zaino, who is 78 years old, had managed the fund for 21 years and created the fund strategy that this team had been implementing, but had stepped back from the management team in 2018 in preparation to eventually retire. Supporting Zaino are James Stoeffel and Brendan Hartman, who manage Royce Micro-Cap fund. This strategy has

consistently held a significantly lower average market cap than its peers and benchmark, so experience in microcap names is relevant for managing this fund. Analyst James Harvey, who worked with Zaino on the strategy for a decade, was also named comanager on the fund at this time. While Zaino has previously managed the fund successfully and the stated strategy has remained consistent through previous turnover, the abrupt mass resignation and resulting uncertainty around the makeup of the long-term management team and eventual strategy warrant careful monitoring.

- Updates since the Spring 2023 RPC Meeting:
  - The management team maintains their commitment to the original fund strategy following Zaino’s return to senior advisor status. The average manager tenure as of June 30, 2023 is 2.1 years. Style analysis charts for the strategy are shown below. Fund style placement has been similar in past markets. 60% of the portfolio is currently invested in micro-cap names, while the current category average allocation to microcap is 7%.

- **ACG Recommendation: Remove from Watch.** The Portfolio Management Team has been in place for over two years. During this time they have consistently applied the investment process used by the previous Lead Portfolio Manager, Buzz Zaino. Despite underperforming in calendar year 2022 due to stylistic headwinds, recent performance results have been strong. In fact, as of 6/30 the fund has either placed near or in the top decile of its small cap value peers over the trailing periods of 3-month, 1-year, 3-years, 5-years and 10-years. We remain critical of the fund’s overall expense ratio at 1.12%, but the fund maintains a high active share of 87 which suggests management is not an index-hugger. KBOR is currently in the lowest cost share class of the fund.

- **Allspring Growth Institutional (Large Cap Growth Option) (Plan assets in fund: \$349k or 0.4% of assets and 62 participants)**
  - Rationale for being placed on Watch at Fall 2022 RPC Meeting:
    - Long-term Performance: After four years of underperformance relative to the peer group median from 2013 to 2016 and bottom-quintile performance in 2021 through the first half of 2022, this fund's long-term risk-adjusted returns ranked in the bottom quartile of the large cap growth peer group. This fund is an all-cap fund and held an average allocation to mid-cap and small cap names of 32% and 11%, respectively, over the trailing decade leading to the decision. The fund was also higher growth than its peer median and benchmark and ranked in the highest-growth quintile of its peer group, which was a tailwind in growth-led markets in previous years but a sharp headwind year-to-date 2022. While peer performance adjusting for the high-growth investment style looked better than the overall large growth peer numbers, ten-year returns currently rank well below median even adjusting for high-growth style. Performance in 2014 ranked in the bottom decile of its peer group due to poor stock selection in information technology, and bottom-quintile performance in 2016 was driven by stock selection in health care and information technology. Year-to-date, a 17% overweight to mid-cap growth relative to the Russell 3000 benchmark detracted 1.7% from relative performance, and stock selection in IT and health care names detracted 2% each from relative performance, respectively. Thomas Ognar, lead manager on the fund, has been on the fund since 2002 and makes all final decisions. Ognar named two comanagers in 2020 to replace the retirement of previous comanagers in 2018 and 2021. Despite the long track record of the management team and strategy, bottom-quintile long-term returns combined with above-average risk metrics warrant monitoring.
  - Updates since the Spring 2023 RPC Meeting:
    - As of the first half of 2023, ten-year returns and risk-adjusted returns remain in the bottom quartile of peers. The fund's high growth, lower average market cap style continued to weigh on performance relative to the Russell 3000 Growth Index during the second half of 2022. Underperformance year-to-date 2023 has been driven by a 10% overweight to financials stocks and poor stock selection in the consumer discretionary sector. One annual period has passed since the Watch recommendation. As of this writing, the fund holds 24% of the portfolio in mid-cap names and 10% in small cap. The chart on the following page shows a summary of annual

returns and peer group rankings.

	Performance (%)									
	Year To Date	2022	2021	2020	2019	2018	2017	2016	2015	
Allspring Growth Inst (SGRNX)	25.78 (53)	-36.89 (81)	7.82 (92)	49.49 (16)	37.65 (12)	0.55 (28)	35.14 (10)	-0.56 (80)	2.94 (64)	
+/- Russell 3000 Growth Index	-2.27	-7.92	-18.03	11.23	1.80	2.67	5.55	-7.95	-2.15	
Large Growth Median	26.07	-30.89	21.96	35.20	32.82	-1.61	28.72	2.83	4.77	

- Effective May 16, 2023, David Nazaret was promoted to portfolio manager on the fund, joining comanager Robert Gruendyke and lead manager Thomas Ognar. Nazaret previously served on this team as an analyst covering health care and information technology and has been with the firm since 2007. Ognar remains lead portfolio manager and continues to make all final investment decisions.
- **ACG Recommendation: Remain on Watch. The investment approach, which prioritizes high-growth companies while also being open to paying a premium for such growth, along with a significant allocation to small and mid-cap companies, has adversely affected the overall performance of the fund. On a positive note, the Plan offers two other large-cap growth options, allowing participants to reallocate their investments accordingly. ACG has advised the RPC to remain patient when it comes to funds on Watch. Unfortunately, given the level of underperformance and two solid large cap growth alternatives, our patience is wearing thin. Unless we witness a substantial improvement in relative performance compared to the fund's benchmark and the median peer group manager over the coming months, we will be prepared to explore alternative strategies with the Committee at the Spring 2024 RPC meeting.**
- **TIAA-CREF Mid-Cap Growth Instl (Mid-Cap Growth Option) (Plan assets in fund: \$362k or 0.4% of assets and 214 participants)**
  - Rationale for being placed on Watch at Fall 2022 RPC Meeting:
    - Manager Change: Effective March 31, 2022, comanager Adrian Almanzan left the strategy and firm for another opportunity. Almanzan had been an analyst and senior director at TIAA since May 2017 and had been a named co-PM on the fund since March 2019. This was the second major departure in the trailing three years prior to the decision, as long-time manager George (Ted) Scalise stepped off the management team of the fund and left the firm in May 2020 following the completion of a merger between Nuveen and TIAA's equity

management teams. Terrance Kontos was brought on in January 2020 to replace Scalise. Kontos had joined the firm in 2012 and has 18 years of experience in the industry, including as co-PM of CREF Growth account since 2014. The departure of Almanzan leaves Kontos as the sole manager on this fund. The relatively frequent management changes and relatively short track record of Kontos on this strategy (2.5 years as of the decision) warranted monitoring.

- Near-term and Long-term Performance: As of June 30, 2022, this fund ranked in or near the bottom decile of the mid-cap growth peer group across all trailing time periods. Near- and medium-term numbers were due largely to bottom-decile performance in 2021 through the first half of 2022, driven by poor stock selection. In 2021, stock selection in consumer discretionary detracted 6.1% from performance relative to the Russell Mid Cap Growth benchmark, while stock selection in information technology (IT) detracted an additional 4.0%. Year-to-date, stock selection in health care and IT detracted 1.0% each from relative performance. Five-year rolling returns over the trailing decade prior to the decision rarely ranked above peer group median due to underperformance in 2016 and 2018, both driven by poor stock selection in industrials. Periods prior to January 2020 occurred under previous management.

▪ Updates since the Spring 2023 RPC Meeting:

- As of June 30, 2023, returns over the trailing year rank above peer group median and the fund no longer ranks in the bottom decile of peers over any trailing period. Near- and long-term returns remain in the bottom quartile of peers. Stock selection continues to drive underperformance, particularly in industrials and consumer discretionary.

	Performance (%)									
	Year To Date	2022	2021	2020	2019	2018	2017	2016	2015	
TIAA-CREF Mid-Cap Growth Instl (TRPWX)	16.10 (30)	-33.08 (74)	2.95 (89)	45.33 (30)	33.39 (51)	-8.17 (78)	26.21 (39)	1.95 (76)	-0.63 (56)	
+/- Russell Midcap Growth Index	0.16	-6.36	-9.78	9.74	-2.08	-3.42	0.94	-5.38	-0.43	
Mid-Cap Growth Median	14.81	-28.50	11.83	36.90	33.47	-5.44	24.90	5.08	0.00	

- **ACG Recommendation: Remain on Watch. Much of the fund's longer-term performance issues can be attributed to previous portfolio managers of the fund. Terrance Kontos took over Lead Portfolio Manager responsibilities in April 2022. Performance results thus far are an improvement over those of previous managers. Review at the Spring 2024 RPC Meeting.**

## **Current Investment Lineup Recommendations as of 6/30/2023**

- No additional Watch recommendations.

### **Share Class Changes**

- **During the Spring 2023 RPC meeting, five share class changes were approved to the TIAA lineup in the Voluntary Plan. The following share class changes were implemented in July 2023.**

<b>Asset Class</b>	<b>Fund(s) Replaced Share Class</b>	<b>Replacement Share Class</b>	<b>Rationale</b>
Large Cap Growth	Allspring Growth Instl.	Allspring Growth R6	Lower cost expense ratio (0.57% vs. 0.68%)
Small Cap Growth	AB Small Cap Growth I	AB Small Cap Growth Z	Lower cost expense ratio (0.76% vs. 0.84%)
Balanced	T. Rowe Price Capital Appreciation	T. Rowe Price Capital Appreciation – Instl.	Lower cost expense ratio (0.57% vs. 0.68%)
Mid Cap Blend	Vanguard Mid Cap Index - Admiral	Vanguard Mid Cap Index - Institutional	Lower cost expense ratio (0.04% vs. 0.05%)
Foreign Value	Dodge & Cox International Stock - I	Dodge & Cox International Stock – X	Lower cost expense ratio (0.52% vs. 0.62%)

- Also at the Spring RPC meeting, TIAA proposed moving from the R3 Share Class to a lower cost R4 share class in the following CREF Variable Annuities. The main difference being the elimination of the Recordkeeping offset.

Investment Product Name	Ticker	Share Class	Recordkeeping Offset	Expense Ratio	Net Cost
CREF Money Market	QCMMIX	R3	0.10	0.18	0.08
CREF Money Market	QCMMFX	R4	0.00	0.06	0.06
CREF Core Bond Account	QCBMIX	R3	0.10	0.22	0.12
CREF Core Bond Account	QCBMFX	R4	0.00	0.10	0.10
CREF Inflation-Linked Bond	QCILIX	R3	0.10	0.17	0.07
CREF Inflation-Linked Bond	QCEQFX	R4	0.00	0.05	0.05

- To move from the R3 to the R4 share classes in the current Voluntary Plan (Retirement Choice Plus (RCP) Contract), KBOR could map participant balances in CREF R3 to R4 and remove R3 from the menu.
  - **ACG Recommendation: With all recordkeeping offsets rebated back to the participant that generated them, we recommend waiting for a decision on the Mandatory Plan. That way if the RPC decides to move forward with the contract change to the Mandatory Plan, share class changes can occur in the Voluntary Plan at same time. This should help to reduce any participant confusion since it would be communicated at the same time.**

## Voya Watch List Review

- **During the Spring 2023 meeting, a number of lineup changes were proposed and approved. The changes were implemented in July 2023. The table below details the changes.**

Asset Class	Fund(s) Replaced	Replacement Fund	Rationale
Large Cap Value	BlackRock Equity Dividend Instl & JPMorgan Equity Income R5	JPMorgan Equity Income R6	Consistent process and risk-adjusted returns.
Large Cap Value Index	N/A	Vanguard Value Index Admiral	Greater style purity and stronger diversifier relative to other index option evaluated.
Large Cap Growth	Voya Large Cap Growth Port I	T. Rowe Price All-Cap Opportunities I	Higher active share, risk-adjusted returns than current option, benchmark, and peer group
Large Cap Growth Index	N/A	Vanguard Growth Index Admiral	Greater style purity and stronger diversifier relative to other index option evaluated.
Small Cap Value	American Beacon Small Cap Value R6	Undiscovered Managers Behavioral Value R6	American Beacon has been on Watch in the Voya Voluntary plan since Spring 2022 for manager changes.
Foreign Large Value	N/A – New Asset Class	Schwab Fundamental Intl Large Company Index	Index fund tracking the Russell RAFI Developed ex US Large Company Index, strong results, competitively priced, good risk-adjusted returns
Emerging Markets Equity	Invesco Developing Markets R6	Fidelity Emerging Markets K	Lower correlations to other investment alternatives than Invesco, stronger risk-adjusted returns
Global Large Cap Growth	VY@ Invesco Global Portfolio Initial	T. Rowe Price Global Stock Instl	Consistent outperformance relative to benchmark and median, stronger risk-adjusted returns than current option. Invesco Global was placed on Watch at the Spring 2023 RPC meeting for near-term underperformance and changes to strategy.

- **As a result, no funds are currently on Watch within the Voya plan as of the Fall 2023 RPC Meeting.**

## **Current Investment Lineup Recommendations as of 6/30/2023**

- No additional Watch recommendations.

# Fiduciary Scorecard

---

- ✓ Indicates the fund passes IPS criteria.
- ✗ Indicates the fund fails the IPS criteria.

## Scorecard Definitions

### Qualitative Factors

**Management:** An evaluation of an investment's organization and/or personnel. A fund is flagged if manager tenure is less than 3 months during the trailing three months as of current quarter-end.

**Operations:** An evaluation of an investment's asset size and change. A fund is flagged if there are very large increases or decreases in asset size during the trailing three months as of current quarter-end.

**Style:** An evaluation of an investment's style, philosophy and/or consistency. A fund is flagged if its current style does not match its designated style and/or has exhibited traits of style inconsistency with historical metrics.

**Near-Term Result** : An evaluation of relative performance to the investment's designated peer group. A three-year period or a time period that more appropriately represents the Designated Investment Alternative's investment style is typically used. A fund is flagged if it falls in the bottom decile for the trailing three-year period as of the current quarter-end.

**Long-Term Performance** : A ten-year period of the performance measures will typically be used. A fund is flagged if it falls in the bottom quartile during the trailing ten-year period as of current quarter-end.

**Return:** An evaluation of relative performance to the investment's designated peer group.

**Alpha:** An evaluation of risk-adjusted return relative to the investment's designated peer group.

**Up Market:** An evaluation of return relative to the investment's designated peer group in positive market periods.

**Down Market:** An evaluation of return relative to the investment's designated peer group in negative market periods.

**Sharpe Ratio:** An evaluation of the Sharpe ratio (return per unit of risk) relative to the investment's designated peer group.

**Overall Long-Term Result** : Aggregate evaluation of relative performance to the investment's designated peer group across factors including return, alpha, up market capture, down market capture and Sharpe ratio. A fund is flagged if it falls in the bottom quartile during the trailing ten-year period as of current quarter-end

**Allspring Growth**

David Nazaret has joined long time manager Thomas Ognar and Robert Gruendyke on the management team of the fund. Nazaret has 24 years of industry experience. Prior to becoming a portfolio manager, he worked as a senior research analyst with a focus on the information technology and healthcare sectors. Nazaret's arrival brings the average tenure of the team to 8.1 years.

**Advisor Recommendation: Remain on Watch**

**JHancock Disciplined Value Mid Cap**

This fund's management team looks for positive momentum and strong fundamentals as well as attractive relative valuations. This strategy results in a portfolio that is typically more blend-leaning than the peer group and benchmark. As the most recent portfolio date as of this writing (May 31, 2023), the fund's average holding falls into the mid cap blend style box in Morningstar, but the strategy has not changed. *2Q 2023*

**Advisor Recommendation: No Action**

**Royce Opportunity**

Three strong quarters have helped near-term returns recover partially from bottom-decile performance during a difficult bear market 2022 sparked by high inflation and an aggressive Fed response. Following strong returns in the first half of 2023, the average portfolio holding falls on the blend side of the line between small cap value and blend; this is not indicative of a change in strategy. The fund consistently has a significantly lower average market cap than its peers and benchmark, holding 60% of assets in microcap names as of this writing. This fund's management team continues to build their track record following the departure of the entire previous team for a competitor in April 2022. Royce temporarily pulled the strategy's founder out of semi-retirement to train in a replacement team which pulled experienced analysts and managers from Royce's microcap fund. Five quarters out, it appears that there have not been any major changes to the fund's philosophy or stated strategy resulting from the departure. Those managers have now invested significantly in the fund alongside investors. Average tenure on this strategy is currently 2.1 years as of this writing. *2Q 2023*

**Advisor Recommendation: Remove from Watch**

**TIAA-CREF Real Estate Sec**

The fund struggled over the past three years because of its modest exposure to the communications/specialty industry, including stocks American Tower and SBA Communications. These declined as investors worried that higher borrowing costs may slow future growth potential. The recent underperformance follows a period of four straight years of top quartile performance from 2017-2020, helping boost the fund's longer-term results. *2Q 2023*

**Advisor Recommendation: No Action**

# Fiduciary Scorecard

---

- ✓ Indicates the fund passes IPS criteria.
- ✗ Indicates the fund fails the IPS criteria.

## Scorecard Definitions

### Qualitative Factors

**Management:** An evaluation of an investment's organization and/or personnel. A fund is flagged if manager tenure is less than 3 months during the trailing three months as of current quarter-end.

**Operations:** An evaluation of an investment's asset size and change. A fund is flagged if there are very large increases or decreases in asset size during the trailing three months as of current quarter-end.

**Style:** An evaluation of an investment's style, philosophy and/or consistency. A fund is flagged if its current style does not match its designated style and/or has exhibited traits of style inconsistency with historical metrics.

**Near-Term Result** : An evaluation of relative performance to the investment's designated peer group. A three-year period or a time period that more appropriately represents the Designated Investment Alternative's investment style is typically used. A fund is flagged if it falls in the bottom decile for the trailing three-year period as of the current quarter-end.

**Long-Term Performance** : A ten-year period of the performance measures will typically be used. A fund is flagged if it falls in the bottom quartile during the trailing ten-year period as of current quarter-end.

**Return:** An evaluation of relative performance to the investment's designated peer group.

**Alpha:** An evaluation of risk-adjusted return relative to the investment's designated peer group.

**Up Market:** An evaluation of return relative to the investment's designated peer group in positive market periods.

**Down Market:** An evaluation of return relative to the investment's designated peer group in negative market periods.

**Sharpe Ratio:** An evaluation of the Sharpe ratio (return per unit of risk) relative to the investment's designated peer group.

**Overall Long-Term Result** : Aggregate evaluation of relative performance to the investment's designated peer group across factors including return, alpha, up market capture, down market capture and Sharpe ratio. A fund is flagged if it falls in the bottom quartile during the trailing ten-year period as of current quarter-end

### **PIMCO Total Return**

Although the fund has outperformed the Bloomberg U.S. Aggregate Index over the past 3-, 5-, and 10-year periods on a gross-of-fee basis, the fund has trailed the Morningstar intermediate core-plus peer group over these same periods. Throughout the past decade, the portfolio managers have been hesitant to add exposure to high-yield corporate bonds, during the tight spread markets from 2020-2022. At quarter-end, the portfolio had 20% in investment-grade corporates, 3% in emerging market debt and just 1% in high-yield credit. By comparison, the category has an average of 28% in investment-grade corporate with 8% in high yield. *2Q 2023*

**Advisor Recommendation: No Action**

### **American Funds Inflation Linked Bond**

Although the fund invests at least 80% of the portfolio in U.S. inflation-protected bonds, the portfolio managers will also invest a small portion in non-inflation-linked bonds including corporates, municipals and securitized bonds. These nominal securities lagged in the past three years as inflation soared and interest rates increased. These positions aided relative performance over the past 10 years during periods of subdued inflation. *2Q 2023*

**Advisor Recommendation: No Action**

### **American Century Mid Cap Value**

A period of underperformance from late 2020 through 2021 combined with a poor second quarter 2023 is currently impacting near-term rankings. 2021 underperformance was driven by both stylistic headwinds and stock selection. Fund management looks for companies with strong management teams, competitive advantages, and low debt that are cheaper than two-thirds of their industry peers. This mandate typically results in a portfolio that is deeper value than its average mid-cap value peer, but at times has resulted in a larger average market cap. This fund underperformed the Russell Mid Cap Value index by 6.6% during the last half of 2020 and by an additional 5.2% in calendar year 2021 as the economy rebounded from the COVID selloff and resulting restrictions. During this period, stock selection in financials, consumer discretionary, and health care drove much of the underperformance. Relative performance recovered in 2022 as markets sold off due to high inflation and an aggressive Fed rate hike cycle, when the fund's positioning and stock selection both added value and the fund outperformed the benchmark by 10.6%. Year-to-date, deep value once again trailed relative value peers and poor stock selection in financials and consumer discretionary detracted from relative performance. Even after former lead manager Phil Davidson retired in March 2023, the management team's average tenure on the fund is 11.8 years as of this writing. *2Q 2023*

**Advisor Recommendation: No Action**

### **Invesco Developing Markets**

The short- to mid-term has not been kind to this fund, over the three and five-year periods it ranks in the bottom of the third quartile in terms of total return. 2021 and 2022 have caused the drag on the three- and five-year numbers, both 2021 and 2022 rank in the bottom quartile for total return relative to the diversified emerging markets peer group. From July 2021 to March of 2022 this fund lost north of 25% due to ramifications of the Russia-Ukraine war and drastic regulations imposed by the Chinese government on its education sector. Entering 2022 this fund had roughly 9% of its assets in Russian stocks, which ultimately went to a valuation of 0. Since then, the fund has kicked it back into gear, year-to-date it is in the top quartile for total return. *2Q 2023*

**Advisor Recommendation: Replaced with the Fidelity Emerging Markets Fund July 2023**

## Where We Are With the Roth Catch-Up Contribution Provision

The lack of guidance to help implement a major new retirement plan design requirement contained in the new SECURE 2.0 Act is causing increased heartburn in the retirement plan stakeholder community.

Over 200 organizations recently wrote a letter to the four leaders of the tax law writing committees on the Hill detailing the concerns and asking for legislation to delay the new requirement for two years.

The letter comes after a separate letter from the tax-writing committee leaders to the Biden Administration's Treasury Secretary and IRS Commissioner highlighting a drafting error in the provision.

### Drafting Error

Section 603 of the SECURE 2.0 Act is a provision intended to require Roth catch-up contributions for individuals making more than \$145,000 in FICA wages. The American Retirement Association (ARA) first identified a drafting error in Section 603 in January, only days after the enactment of the SECURE 2.0 Act, which President Biden signed into law on December 29, 2022.

The language of Section 603, to allow for a conforming amendment, struck a catch-up contribution subparagraph – section 402(g)(1)(C) – from the Tax Code. Because this section of the Tax Code is now gone, the ARA determined that now no participants will be able to make catch-up contributions (pre-tax or Roth) beginning in 2024.

The ARA immediately alerted both the Treasury Department and the Joint Committee on Taxation to the issue due to the significant policy implications of the unintended drafting error and the need to get it fixed as quickly as possible. In response to the concerns raised, the so-called “Four Corners,” who are the Democratic and Republican leaders of the House and Senate tax-writing Committees in Congress, sent a letter to the Treasury Secretary and the Internal Revenue Service Commissioner in May to highlight Congressional intent concerning Section 603.

In the letter, the Hill acknowledged that the current language of Section 603 “might be read by some to disallow catch-up contributions (whether pre-tax or Roth) beginning in 2024.” However, the letter states that this outcome was not Congress's intent, as noted in a Senate Finance Committee Report (S. Rept. 117-142) on the provision before it became law.

What remains unclear is whether the Treasury Department has the regulatory authority or the willingness to ignore the Section 603 drafting error, despite the Congressional letter of intent. If the Treasury Department determines that they do not have the authority to ignore the error and if Congress does not pass legislation fixing the error, then all catch-up contributions will be put in jeopardy starting next year.

### Two-Year Delay

Irrespective of the Section 603 drafting error, there has been an increasingly active and vocal lobbying campaign from large employer retirement plan sponsor groups and their retirement plan recordkeepers to get Congress to provide a two-year delay of the Section 603 Roth catch-up requirement. These groups, including the American Retirement Association, wrote a letter to the Four Corners on June 29, 2023.

In the letter, the groups explained that proper systems do not yet exist and cannot be built within a year to instantly coordinate payroll systems with plan recordkeeping systems to ensure compliance with Section 603 before it becomes effective in 2024. Therefore, if relief from Section 603 compliance is not granted before the Fall, many plan sponsors will be, as a practical matter, forced to eliminate all catch-up contributions in their retirement plans, at least until they get updated systems in place.

It is also unclear if the Treasury Department has the authority or willingness to implement a two-year delay or provide some other type of Section 603 compliance relief. As the clock continues to tick with no Section 603 legislative or administrative actions forthcoming, plan sponsors will face increasingly unsavory choices as the days grow shorter in 2023.

Remo, Andrew. “Where We Are With the Roth Catch-Up Contribution Provision.” July 3, 2023. <https://www.napa-net.org/news-info/daily-news/where-we-are-roth-catch-contribution-provision>

## How Asset Managers Are Addressing the DC Plan Retirement Income Challenge

With an increasing number of plan sponsors apparently wanting to retain plan assets post-retirement, retirement income initiatives in 401(k) and other defined contribution (DC) plans have increased in recent years.

According to a 2022 Cerulli survey of DC plan consultants, 58% of their plan sponsor clients are either actively seeking to retain participant assets post-retirement or prefer to do so.

As a result, asset managers have responded to this perceived demand and asset-gathering opportunity with increased decumulation product development and distribution efforts, the firm notes in the latest issue of *The Cerulli Edge—U.S. Monthly Product Trends*, which analyzes product trends as of May 2023.

Target-date funds (TDFs) that include investments geared toward producing investment income have received much attention, as have annuities and insurance guarantees of various types. However, other activity has been directed toward the development of nonguaranteed solutions constructed outside a TDF structure, the report notes. According to Cerulli's 2022 survey of DC plan recordkeepers, the retirement income products most offered on their platforms are TDFs with a retirement income vintage (67%) and an investment product with an annuitization component (50%), including a TDF.

Standalone products are seen less often, the firm notes. Availability of these solutions on recordkeeping platforms is mirrored by development and distribution efforts. Of Defined Contribution asset managers, 57% offer a target-date fund with a retirement income vintage, and 20% offer a TDF with an annuitization component.

### Specialized Offerings

Meanwhile, more specialized retirement income offerings—such as managed payout funds (17%) and retiree-focused equity products (11%)—are less common. That said, industry activity in recent years shows that more attention is being paid to these non-TDF solutions, Cerulli emphasizes.

In fact, managed payout funds currently are among the least offered solutions by asset managers (17%) but saw the greatest percentage increase in use compared to 2021 survey results (10%), the report shows.

To that end, Cerulli notes that, in 2019, T. Rowe Price launched a managed payout feature for DC plan participants, which targets a 5% annual distribution rate—higher than the 4% distribution rate typically seen in similar products. According to the report, this was intended to help investors “avoid regret” from spending too conservatively in retirement while still operating within safe withdrawal rate guidelines. “This type of investment policy decision highlights one way for asset managers to differentiate their products from others available in the market,” Cerulli observes.

Other asset managers, meanwhile, are looking to liability-driven investing (LDI) principles used in defined benefit plans to provide participants with retirement income options. For instance, LGIM America in 2022 launched its Retirement Income 2040 Fund. Cerulli notes that this product is intended specifically to generate income during an investor’s early-to-mid years of retirement, leveraging LGIM’s expertise in LDI management. A longer duration solution apparently is in development, according to the firm.

Based on a survey of affluent households (i.e., those with investable assets of \$250,000 or greater) conducted in 2022 and 2023, in addition to sustainable income, investors want their retirement portfolios to accomplish other goals:

- 59% want their retirement income plan to allow for the ability to withdraw excess funds when needed;
- 56% want their portfolio to have growth potential even after beginning account withdrawals; and
- 42% want the ability to change their investments in the future.

“As asset managers continue to navigate around the desires of the participants and plan sponsors they serve in addition to volatility in capital markets and interest rate policies, the ecosystem of retirement income solutions within DC plans will continue to evolve,” Cerulli says in a concluding observation.

Godbout, Ted. “How Asset Managers Are Addressing the DC Plan Retirement Income Challenge.” July 5, 2023. <https://www.asppa.org/news/how-asset-managers-are-addressing-dc-plan-retirement-income-challenge>

## Protecting Your Retirement Savings Online

Cybersecurity—and its importance to retirement plans and savings—being top of mind, Assistant Secretary of Labor Lisa M. Gomez has some suggestions on reducing the risk of fraud or loss to your retirement account.

Register, set up, and regularly monitor an online account.

Regularly checking a retirement account:

- reduces the risk of fraudulent account access; and
- makes it possible to identify and follow up on suspicious activity quickly.

Failing to register may allow cyber criminals to assume one’s online identity.

Use a strong and unique account password.

Avoid using:

- dictionary words; and
- sharing, reusing, or repeating passwords.

Instead:

- use letters, numbers, special characters, and 14 or more characters; and
- update a password regularly.

Use multi-factor authentication.

Multi-factor authentication may be cumbersome; however, it is very effective in preventing unauthorized access.

Identity verification can be accomplished by:

- using a fingerprint;
- entering an email; or
- text code.

Keep personal information up to date.

Updating contact information whenever it changes and providing multiple communication options allows one to be reached if there is a problem.

Keep track.

The following can be helpful:

- Keep track of accounts.
- Sign up for activity reports.
- Close unused accounts.

Free Wi-Fi isn’t always free.

It is best to not use a public Wi-Fi network when checking on a retirement account. This is because criminals can access public WiFi networks. Using a cell phone and a home network is more secure.

Don’t fall victim to phishing scams.

Generally, phishing attacks target passwords, account numbers, and sensitive information. Beware of:

- phishing messages that may appear to be from a trusted organization;
- an unexpected text message or email;
- spelling errors; and
- poor grammar.

Install antivirus software.

Use trustworthy antivirus software.

Keep apps and software up to date.

Keep software and apps software updated with the latest patches and upgrades; outdated apps and software can pose a security risk.

Know how to report identity theft and cybersecurity breaches.

Victims of a cybersecurity attack can contact the FBI or the Department of Homeland Security to file a report. Two places at which to do so are:

- <https://www.fbi.gov/file-repository/cyber-incident-reporting-united-message-final.pdf/view>
- <https://www.cisa.gov/report>

Gomez reminds that plan fiduciaries have a responsibility to protect a plan against cybersecurity risks. This includes, she says, ensuring that recordkeepers and other service providers responsible also safeguard information.

## Strategy – 3rd Quarter 2023

Interest rates have been rising steadily since May. The yield on the 2-year maturity Treasury note has increased from 3.80% to nearly 5.0%. Similar changes have occurred all along the yield curve but at a slightly lower magnitude. The movement in the 2-year Treasury reflects the steady increase in the fed funds rate as well as expectations of additional rate hikes. We have been somewhat puzzled by the movement in the longer end because inflation has been falling steadily. The longer end of the yield curve tends to have a strong correlation to inflation. Recall headline CPI has fallen from 9% to 3% as of June. The large monthly CPI data releases should come to an end this month. Future declines will be harder to produce. The market likely got ahead of itself when rates fell sharply in March and the start of April. It's taken most of this back as unified Fed rhetoric voiced concerns over core inflation.

One interesting segment of the fixed income markets that is very attractive is the mortgage-backed securities (MBS) sector. Yield spreads are extremely wide versus historical norms. MBS with a 20-year final maturity trade at yield spreads of 100 – 140 basis points depending on the coupon. Lower coupon pools tend to trade at lower yield spreads than higher coupon pools because lower coupon pools have less prepayment risk. Pools with a 15-year original maturity provide yield spreads of 50 – 115 basis points. The yields for both 20 and 15-year pools range from 4.80% - 5.60%. The lower coupon pools trade at a significant discount making prepayments at par very attractive. Since these investments are backed by the government, there isn't any credit risk. This could be very valuable if there is a recession next year.

Many people have commented that the peak in yields is around the 6-month maturity. Many don't understand why an investor may benefit from investing their money longer and receiving a lower yield, which typically isn't the case. The reason is that yields are expected to be lower next year. Why take reinvestment risk in 6 months when you can purchase fixed income securities with attractive yields for a much longer timeframe? Yields are the highest in many years and logic dictates taking advantage of the current yield environment.

Near-term we expect base effects to produce a market sentiment that suggests inflation is behaving, followed by a reversal that head-fakes the market into thinking that the Fed is fighting inflation with insufficient tools. Fiscal policy has the ability to muddy the waters. Even if the student loan jubilee efforts turn into a forbearance extension of roughly a year, that is a stimulus of between \$144 billion (assuming the average student loan payment is \$300/month and there are 40 million loans) and \$400 billion of debt is forgiven. The third or fourth quarter of this year seems to be shaping up to be the moment when liquidity and financing become scarce, risk spreads widen, and broad risk appetites are recalibrated. Leading up to the stress, we have a bias toward quality and liquidity, but as we've said many times in the past, bond portfolio management in our view is about portfolio construction and "tilting" toward safety or risk. It seems like 2023 will be the year of planning, adjusting, and constructing the portfolio in the current "higher" yielding environment, along with formulating the plan to participate in the dynamic environment we expect for the balance of 2023.

ACG's research suggests that owning quality bonds with longer duration near the conclusion of a Fed tightening cycle historically has produced some of the more compelling forward returns of most of the return factors we track. Offsetting this opportunity is the fact that risk spreads are currently tight (risk spreads are the incremental yield investors earn for holding a non-Treasury bond as compared to a like-maturity Treasury). We think spreads will "adjust" higher from the current state which is approximately a full standard deviation "tight" as compared to the relationship for the past decade (using "A" rated corporates with a 10-year maturity). If this correction occurs, we will likely be enthusiastic about fully expressing our bias for high-quality long-duration assets. In the meantime, a barbell strategy of some short and liquid holdings and longer duration should position appropriate investors with a portfolio that has strong earning horsepower and the ability to be opportunistically nimble over the remainder of 2023, to set portfolios up for a potentially exciting 2024.

## Observations and Outlook – Here Comes the Head Fake

Many things that usually signal a pending recession have been in place for quite a while, yet no GDP data points to negative growth. Examples of these signals include an inverted yield curve, restrictive monetary policy, leading indicators that have been falling for numerous months, and a decline in year-over-year Gross Domestic Income (GDI). This last point is notable because there has never been a year-over-year decline in GDI without a preceding or coincident recession. GDP data tends to track GDI data and GDP revisions tend to follow GDI. It would seem the slowing inflationary dynamic has momentum to continue, and a "soft landing" may be difficult to achieve.

Based on the third revision to 1Q GDP, growth was 2.0% in the first quarter. The 2<sup>nd</sup> quarter looks to be somewhere between 2.0% and 2.4%. The Bloomberg Economic Surprise Index hit a 2-year high. A strong labor market continues to provide fuel for consumers to spend. Consumer spending is nearly 70% of GDP. Real incomes are now growing. As consumer spending goes, so goes economic growth. There remain over 9 million unfilled jobs leading one to assign a very low probability to an imminent slowdown in the labor markets. The most recent nonfarm payroll report showed a slight slowdown in job creation with a moderate gain in wages. GDP will likely be negatively impacted by the resumption of student loan payments later this summer, but the Administration is working on ways to delay it further.

Even though the Fed has indicated it will raise rates up to two more times this year, inflation continues to fall. The Consumer Price Index (CPI) peaked at 9.1% in June of 2022. The June 2023 CPI YOY reading was 3.0%. The money supply has also declined, which tends to foretell a decline in inflation by 13 months. Most agree inflation is falling. The Fed is focused on "supercore" inflation. This measure removes food, energy, and housing. The issue is that isn't falling fast enough.

As the third quarter of 2023 is underway, it seems the Fed can nearly abandon half of their dual mandate, price stability and full employment, for the near-term. Although a slowing in some of the job metrics has materialized, unemployment is currently 3.6% and wages are growing at an annualized rate of 4.4%. The decelerating aspect of the job market comes from recent downward revisions to the April and May job growth and the slowest pace of nonfarm payroll growth since late 2020. The quarter should play out as a whirlpool of tight monetary policy, colliding with loose fiscal policy, mixed with nonuniform economic results and waves of vacillating market sentiment.

Monetary policy will be restrictive. Even if the Fed doesn't raise the Fed Funds rate 25 – 50 basis points more this year as is anticipated, current Quantitative Tightening (QT) balance sheet reduction efforts are expected to result in roughly a \$1 trillion shrinkage of the Fed's balance sheet. The Fed Funds Rate is in restrictive territory so borrowing costs are starting to weigh on some consumers and corporations. Although unemployment is very low and wages are climbing, there are efforts to continue the series of stimulative fiscal policies, not-too-dissimilar to the stimulus programs that topped off the end of the pandemic and likely contributed to this bout of inflation. Student loan debt forgiveness is said to help more than 40 million Americans. Following the debt ceiling negotiations, where student loan payments were to resume in October, the Supreme Court struck down the Biden Administration's student loan forgiveness policy. In response, the Administration has a "no consequences" solution. Borrowers who miss payments will be spared many of the usual consequences of non-payment until October of 2024, which is somewhat close to the November elections. Loans will not go into default and delinquencies will not be reported to the credit reporting agencies. A two-year pandemic will turn into a four-year debt forbearance in a strong job environment. It is relevant to the collision between monetary policy and offsetting fiscal policy because the debt forgiveness jubilee would represent nearly half a trillion dollars of stimulus. It feels like a future recession of character may be born out of our current solutions to problems of many non-needy people. On a short-term basis, the "no consequences" solution improves student loan borrower's cashflow by approximately \$300 per month

## Financial Institutions Insights: Still Waiting...for the Recession

(Source: US News & World Report, as of March 2023). That has been and will continue to be a lot of additional dollars circulating around in the economy.

Away from stimulative fiscal efforts, economic releases and persistent strength will likely make the third quarter the one where the crescendo of calls that the Fed is behind the curve and, that they may not have the tools to fight this brand of inflation, rises to the top of the headlines. Despite recently elevated mortgage rates, the consequences of 2022's second and fourth quarter's decline in residential investment has contributed to a shortage of existing homes for sale. What has been a drag on GDP growth may contribute to the sticky inflation that we anticipate will present itself in the 3<sup>rd</sup> quarter of 2023. Institutional buyers of residential homes have been on the sidelines for much of this year as price increases and financing costs have resulted in institutional buyers acquiring 90% fewer homes in the first couple months of 2023 as compared to the same period in 2022. If rates or prices fall, look for institutional buyers to jump back into the market, which should create a natural price floor. Without the institutional buyers housing demand has exceeded supply and as of April, new listings of existing homes remain 20% below the levels of a year ago. Past underinvestment, limited supply and robust demand suggest that housing could be a contributor to stubborn signs of inflation.

Base effects, the result of comparing a growth statistic to a particularly outsized number experienced during the preceding year, made the June 2023 headline CPI number look like inflation is subsiding. In late July, the Fed is expected to hike the Fed Funds Rate one more time (by 25 basis points). We expect the same base effects that make the market think inflation is significantly slowing, will reverse in July and August. The combination of a Fed rate hike that the market may interpret to be ineffective, with base effects that show inflation is not steadily in decline should precipitate a market reaction that the Fed is behind the curve and that the inflation genie can't be put back in the bottle (because this brand of inflation is different). Stocks, which are fully valued by historical measures will likely send a temporary signal of strength as short positions have diminished and recent "high" levels and valuations may be carried even higher due to the regret of not being along for the ride up the "wall of worry" and the age-old "FOMO" (Fear of Missing Out).

As mentioned last quarter, our thesis continues to be that the weight of restrictive Fed policy, both in the form of quantitative tightening and through previous and upcoming Fed Funds Rate hikes, along with negative money growth supply and a more smoothly functioning global supply chain means fewer dollars may be chasing an adequate number of goods and services. Money supply shrinkage often heralds recessions, and U.S. M2 money supply is shrinking at the fastest pace since the 1930s. Also adding to the weight of the situation is tighter lending standards on the part of community banks, and an unknown degree of carnage that banking system exposure to commercial real estate may cause bank profits and lending capacity to diminish. Banks with less than \$100 billion in total assets have 14.4% of their assets in commercial real estate, nearly twice the exposure of banks with between \$100 billion and \$250 billion in assets, with 8.15% in commercial real estate loans. About 15% of U.S. banks now exceed the 2006 FDIC guidance on commercial real estate loan exposure. Banking system liquidity may be further challenged by continued Fed QT efforts (moving at a pace of roughly \$1 trillion per year) and banking system reserves that may be drained out of the system as the U.S. Treasury fills its coffers with approximately \$1 trillion in debt issuance, following the inability to issue debt leading up to the debt ceiling crisis. It has been estimated that the banking system needs to have \$2.5 trillion in deposits at the Fed and currently reserves stand at \$3.2 trillion. Clearly the Fed has injected liquidity when needed

(such as the Reverse Repo Liquidity Facility) but it rarely elicits market confidence in markets when the Fed must run to the rescue.

Another theme we have expressed for the past few quarters is that the zombie companies and the zombie consumers are coming for us (we have even presented the idea of zombie governments, but their pockets are so deep that we don't think the weight of higher rates will impact them in the short run). 55% of the smallest quintile companies in the Russell 2000 (small cap index) are unprofitable. In the top quintile of the largest companies in the same index, a surprising 20% of companies are unprofitable. It makes us wonder why people are paying such high multiples for stocks when many of them are not profitable. Perhaps the plan is to lose money slowly but make it up in volume. As sources of stimulus and liquidity are drained from the economy, it feels like zombie corporate borrowers, and stocks of unprofitable companies are poised for difficult times. Currently the junk rated debt sector is pricing in a default rate of roughly 4.6%. If a recession occurs, it would be reasonable to see high yield defaults move closer to 8%. Risk markets seem priced for perfection and some disappointment seems to be more of a sure thing, rather than achieving "perfection." Zombie consumers may be moving in step with struggling corporations. Consumers may be changing behaviors as they have whittled-down savings that were accumulated during the pandemic, they have added to their credit card balances, and now they are "trading down" on basic goods. General Mills recently issued a profit warning, saying that consumers are substituting brand names for lower-cost alternatives. General Mills' volumes fell in the last fiscal year in all categories except for North American foodservice. When people ditch their Honey Nut Cheerios for Honey O's, you know consumer behavior is changing, eventually their psyche will follow subconscious trades and substitutions. Other signs of a discretionary recession, meaning trading down or skipping unnecessary expenses, are upon us. In a poll released at the end of May, 83% of Americans think the economy is fair or poor, and 72% expect it to get worse. According to Citigroup, through April, U.S. credit card spend on "Luxury" was down nearly 40% from a year earlier. Black Box Intelligence says that casual dining traffic has declined by 5.4%. Consumers may be encouraged to eat at home more because according to the Bureau of Labor Statistics, May restaurant price increases were 8.3% annualized as compared to the growth in cost of retail food, which grew at 5.8% annualized. The pain of inflation may finally be overwhelming people. According to economists at the University of California at Berkeley, the inflation-adjusted value of assets held by the middle class has fallen 6%, or \$2.4 trillion, or \$34,000 per middle-class adult. We have known that savings rates were falling, and consumer debt is at or near all-time highs, but balances on home equity lines of credit rose by \$3 billion in the first quarter of 2023, the fourth continuous quarter of increases after nearly 13 years of declines. As consumers' bad feelings turn to changed behaviors, corporate profits should sink, and a recession seems to be the most reasonable outcome.

Below are descriptions of a selection of commonly used broad market indices. Indices are unmanaged; you cannot invest directly in an index. Index returns do not include fees or expenses.

### Domestic Equities

**CRSP US Total Market Index:** Consists of nearly 4000 companies across mega, large, small and micro capitalizations, representing nearly 100% of the US investible market.

**CRSP US Large Cap Index:** Consists of the top 85% of investable market capitalization in the US, including mega and large cap companies. Included in this market cap are the **CRSP US Large Cap Growth Index**, which measures the performance of those companies with higher price-to-book ratios and higher forecasted growth values and the **CRSP US Large Cap Value Index**, which measures the performance of those 3000 companies with lower price-to-book ratios and lower forecasted growth values.

**CRSP US Mid Cap Index:** Consists of US companies that fall between the top 70% - 85% of the investable market capitalization. Included in this market cap are the **CRSP US Mid Cap Growth Index** and **CRSP US Mid Cap Value Index**.

**CRSP US Small Cap Index:** Includes US companies that fall between the bottom 2% - 15% of the investable market capitalization. There is no lower limit in market cap, other than what is specified by investability screens. Included in this market cap are the **CRSP US Small Cap Growth Index** and **CRSP US Small Cap Value Index**.

**Dow Jones US Total Stock Market Index:** Measures all US equity issues with readily available prices.

**Dow Jones US Completion Total Stock Market Index:** Subindex of DJ US Total Stock Market Index that excludes components of the S&P 500.

**MSCI US REIT Index:** A free float-adjusted market capitalization index that is comprised of equity Real Estate Investment Trusts (REITs). The index is based on the MSCI US Investable Market Index (IMI), its parent index, which captures the large, mid and small cap segments of the US market. It represents about 99% of the US REIT universe.

**Russell 3000 Index:** Measures the performance of the 3000 largest US companies based on market capitalization. Subindices include the **Russell 3000 Growth Index** and the **Russell 3000 Value Index**.

**Russell 1000 Index:** Measures the performance of the 1000 largest companies in the Russell 3000 Index, generally representing more than 90% of the investible US equity market. Included in this market cap are **Russell 1000 Growth Index** and the **Russell 1000 Value Index**.

**Russell 2000 Index:** Measures the performance of the 2000 smallest companies in the Russell 3000 Index, representing less than 10% of the investible US equity market. Subindices include the **Russell 2000 Growth Index** and **Russell 2000 Value Index**.

**Russell MidCap Index:** Measures the performance of the 800 smallest companies in the Russell 1000 Index. Included in this market cap are the **Russell MidCap Growth Index** and **Russell MidCap Value Index**.

**S&P 500 Index:** Widely regarded as the best single gauge of the US equities market. The index includes a representative sample of the 500 leading companies in leading industries of the US economy. This index focuses on the large-cap segment of the market; however, since it includes a significant portion of the total value of the market, it also represents the market.

**S&P 600 SmallCap Index:** Measures the performance of a broad range of small-sized companies that meet specific liquidity and stability requirements as determined by S&P. Market cap must be between \$850 million and \$3.6 billion.

**S&P 400 MidCap Index:** Measures the performance of a broad range of mid-sized companies that meet specific liquidity and stability requirements as determined by S&P. Market cap to be included in this index is between \$3.7 billion and \$14.6 billion. Included in this market cap are the **S&P 400 MidCap Growth Index** and the **S&P 400 MidCap Value Index**.

**S&P Completion Index:** Comprises all members of the S&P Total Market Index (TMI) except for the current constituents of the S&P 500.

**S&P Total Market Index (TMI):** Designed to track the broad equity market, including large, mid, small and micro cap stocks.

**S&P Composite 1500 Index:** Combines the S&P 500, S&P MidCap 400 and S&P SmallCap 600 indices to cover approximately 90% of US market capitalization. It is designed for investors seeking to replicate the performance of the US equity market. S&P Composite 1500 includes additional specific GICS Sector indices as well (i.e., Consumer Discretionary Index, Energy Index, Healthcare Index, etc.).

### International Equities

**FTSE Global All Cap ex US Index:** Comprises large, mid and small cap stocks globally, excluding the US. The index is derived from the FTSE Global Equity Index Series which covers 98% of the world's investable market capitalization.

**MSCI ACWI (All Country World Index):** MSCI ACWI is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of large and midcap stocks across 23 developed and 24 emerging markets.

**MSCI ACWI ex US:** Consists of all companies in the MSCI ACWI with the exception of US companies. The index covers approximately 85% of the global equity opportunity set outside the US. Included in this market cap are the **MSCI ACWI ex US Growth Index**, which captures large and mid cap securities exhibiting overall growth style characteristics across the non US developed and emerging markets, and the **MSCI ACWI ex US Value Index**, which captures large and mid cap securities exhibiting overall value style characteristics across the non US developed and emerging markets. The MSCI ACWI ex US Index is also subdivided into the **MSCI ACWI ex US Smid Cap Index** and **MSCI ACWI ex US Small Cap Index** (including Growth and Value indices for each).

**MSCI EAFE (Europe, Australasia, Far East):** MSCI EAFE is a free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the US and Canada. It captures approximately 85% of the market in each country. **MSCI EAFE Growth Index** and **MSCI EAFE Value Index** are also available for this market capitalization. The MSCI EAFE Index is also subdivided into the **MSCI EAFE Smid Cap Index** (including Growth and Value Indices).

**MSCI Emerging Markets Index:** A free float-adjusted market capitalization index that is designed to measure the equity market performance in the global emerging markets.

## Fixed Income

**Bloomberg 1-3 Month US Treasury Bill Index:** Includes all publicly issued zero-coupon US Treasury Bills that have a remaining maturity of less than 3 months and more than 1 months. They are rated investment grade and have \$250 million or more of outstanding face value. In addition, the securities must be denominated in US dollars and must be fixed rate and non-convertible. This index is also available in a 3-6 month offering: **Bloomberg 3-6 Month US Treasury Bill Index**.

**Bloomberg Global Aggregate Index:** Measures global investment grade debt from 28 local currency markets. This multi-currency index includes treasury, government-related, corporate, and securitized fixed-rate bonds from both developed and emerging markets issuers.

**Bloomberg 1-5 Year US Govt/Credit Index:** Tracks the market for investment grade, USD-denominated, fixed rate treasuries, government-related and corporate securities with maturities between 1 and 5 years.

**Bloomberg Global Aggregate ex US Index:** A subset of the Bloomberg Global Aggregate that does not include US countries.

**Bloomberg US Aggregate Index:** Represents the full range of investment grade bonds (rating of Baa or higher from Moody's rating of BBB- or higher from S&P) traded in the US. The index includes government, agency, and corporate credits.

**Bloomberg US Corporate Bond Index:** Measures the investment-grade fixed-rate, taxable corporate bond market. It includes USD-denominated securities publicly issued by US and non-US industrial, utility, and financial issuers.

**Bloomberg Intermediate US Govt/Credit Bond Index:** Measures the non-securitized component of the US Aggregate Index with less than 10 years to maturity. The index includes investment grade, USD-denominated fixed-rated treasuries, government-related, and corporate securities.

**Bloomberg US TIPS Index:** Consists of inflation-protection securities issued by the US Treasury.

**Bloomberg US High Yield Index:** Covers the universe of fixed rate, non-investment grade debt.

**FTSE World Government Bond Index:** Measures the performance of fixed-rate, local currency, investment-grade sovereign bonds from over 20 countries.

**ICE BofAML Convertible Bond Index:** Measures the performance of convertible bonds, which are a fixed-income corporate debt security that yields interest payments but can be converted into a predetermined amount of equity, cash or another security of equal value.

**ICE BofAML US HY Master II:** Represents the performance of below investment grade bonds (rated Ba1 or lower from Moody's, BB+ or lower from S&P) publicly issued in the US market.

## Multi-Asset

**Dow Jones Relative Risk Index Series:** Designed to measure a total portfolio of US stocks, bonds, and cash, allocated to represent an investor's desired risk profile. The index used to benchmark a fund is dependent on the equity weighting of the fund.

**Target Date Indices:** Measures the performance of multi-asset portfolios that correspond to a particular target retirement date. Each index provides varying levels of exposure to equities and fixed income, and each target date allocation is created and retired according to a pre-determined schedule related to the respective target date. We use various target date indices dependent on the target date series it is being benchmarked against (i.e., Vanguard target date indices, DJ US target date indices, TRP target date indices, etc.).

**% Assets in Top 10 Holdings:** The aggregate assets, expressed as a percentage, of the fund's top 10 portfolio holdings.

**Alpha:** A measure of performance on a risk-adjusted basis. Alpha takes the volatility (price risk) of a mutual fund and compares its risk-adjusted performance to a benchmark index. The excess return of the fund relative to the return of the benchmark index is a fund's alpha.

**Beta:** A measure of the volatility, or systematic risk, of a security or a portfolio in comparison to the market as a whole.

**Down Market Capture:** Downside Capture Ratio measures manager's performance in down markets. A down-market is defined as those periods (months or quarters) in which market return is less than 0. In essence, it tells you what percentage of the down-market was captured by the manager. For example, if the ratio is 110%, the manager has captured 110% of the down-market and therefore underperformed the market on the downside.

**Expense Ratio:** A measure of what it costs an investment company to operate a mutual fund. An expense ratio is determined through an annual calculation, where a fund's operating expenses are divided by the average dollar value of its assets under management. Operating expenses are taken out of a fund's assets and lower the return to a fund's investors.

**Information Ratio:** A ratio of portfolio returns above the returns of a benchmark to the volatility of those returns. The information ratio (IR) measures a portfolio manager's ability to generate excess returns relative to a benchmark, but also attempts to identify the consistency of the investor. The higher the IR the more consistent a manager is.

**PM Tenure:** This represents the number of years that the current portfolio manager has been managing the fund. For funds with more than one manager, the average tenure is shown.

**Price/Book Ratio:** The price/book (P/B) ratio compares a stock's market price with its book value. (Book value is the equity balance on a firm's balance sheet divided by the number of shares outstanding.) Conservative investors often prefer the P/B ratio, because it offers a more tangible measure of a company's value than earnings do. Legendary investor Benjamin Graham, one of Warren Buffett's mentors, was a big advocate of book value and P/B in valuing stocks.

**Price/Cash Flow Ratio:** The price/cash flow (P/CF) ratio is not as commonly used or as well known as the other measures we've discussed. It's calculated similarly to P/E, except that it uses operating cash flow instead of net income as the denominator. Cash flow can be less subject to accounting shenanigans than earnings because it measures actual cash, not paper or accounting profits. P/CF can be helpful for firms such as utilities and cable companies, which can have more cash flow than reported earnings. P/CF can also be used in place of P/E when there are so many one-time expenses that reported earnings are negative.

**Price/Earnings Ratio:** The price/earnings (P/E) ratio is the most popular valuation ratio used by investors. It is equal to a stock's market price divided by the earnings per share for the most recent four quarters. The nice thing about P/E is that accounting earnings are a much better proxy for cash flow than sales. Moreover, earnings per share results and estimates about the future are easily available from just about any financial data source.

**Sharpe Ratio:** A ratio developed by Nobel Laureate William F. Sharpe to measure risk-adjusted performance. The Sharpe ratio is calculated by subtracting the risk-free rate (such as that of the 10-year U.S. Treasury bond) from the rate of return for a portfolio and dividing the result by the standard deviation of the portfolio returns.

**Standard Deviation:** A risk statistic that measures an investment's volatility around the mean return. A highly volatility investment will have a higher standard deviation. A fund's returns fell within 1 standard deviation of the average 68% of the time and within 2 standard deviations 95% of the time for the time period measured.

**Upside Capture Ratio:** This ratio measures a manager's performance in up markets relative to the market (benchmark) itself. It is calculated by taking the security's upside capture return and dividing it by the benchmark's upside capture return.

**Weighted Average Market Cap:** The average market capitalization of a fund's equity portfolio gives you a measure of the size of the companies in which the fund invests. Market capitalization is calculated by multiplying the number of a company's shares outstanding by its price per share.

# Client Information Privacy Notice

## **We Respect Your Privacy**

Advanced Capital Group, Inc. has always placed a high value on the trust and confidence our clients place in us. We believe that confidence must be earned and validated through time. In today's world, when technology allows the sharing of information at light speeds, trust must be reinforced by our sincere pledge to take the steps necessary to ensure that the information you share with us is treated with respect and confidentiality.

## **Our Pledge to Our Clients**

We collect only the information we need to service your account and administer our business. We are committed to keeping your information confidential and we place strict limits and controls on the use and sharing of your information. We make every effort to ensure the accuracy of your information.

## **Categories of Information We Disclose and Parties to Whom We Disclose**

We do not disclose any non-public personal information about our current or former clients to non-affiliated third parties, except as required or permitted by law.

## **We Place Strict Limits and Controls on the Use and Sharing of Your Information**

We restrict access to non-public information about your plan to authorized employees who need the information to administer your business. We maintain physical, electronic and procedural safeguards that comply with federal standards to protect this information.

Investment advisory services are offered through Advanced Capital Group ("ACG"), an SEC registered investment adviser. The information provided herein is intended to be informative in nature and not intended to be advice relative to any specific investment or portfolio offered through ACG. Information contained in this report is from sources deemed to be reliable. ACG is not liable for errors from these third sources.
