

KANSAS BOARD OF REGENTS
Math Faculty Professional Development
MINUTES
January 24th, 2025

The January 24th, 2025, Math Faculty Professional Development session was called to order by Whitney Turner at 2:00 p.m. The meeting was held via zoom.

MEMBERS PRESENT: 29 institutions were represented. A full list of attendees is on pg. 2

Welcome

Whitney Turner called the meeting to order and introduced herself as the co-chair of the Math Pathways Task Force. She shared that this meeting will be the last in the Math Pathways Professional Development series.

Assessing Math Pathways Programs

Brandon Protas from Complete College America introduced himself and began the presentation by explaining the difference between the Traditional Prerequisite Remedial Model and the Corequisite Support Model. He shared data exhibiting the success of prerequisite developmental education as compared to corequisite support. He emphasized that the Corequisite Model increases student success as well as saving students time and money. He covered types of assessment, including using outcomes data and direct student feedback, and how using both can help improve programs. The full presentation can be found on the [KBOR Website](#).

Brandon was asked if he thought data would change significantly when looking at a cohort of non-traditional students who have been out of school for a number of years. He responded that research has found that students of all levels of academic preparedness had better outcomes with the corequisite model. He added that the results have been consistent across the board between two-year and four-year institutions.

Dr. JBR was asked if KBOR will be using the through-put rate instead of course pass rate in its assessment of the programs. She responded that the CCA launch event in February will have a session to discuss how both KBOR and institutions will measure effectiveness.

Concerns were raised regarding students who are not prepared for the corequisite courses. Brandon Protas responded that research shows that all students are better supported through corequisite compared to prerequisite support.

Asset-Based Perspectives

Joleigh Honey from the Dana Center introduced herself and shared her learning intentions for the session. Her full presentation on asset-based perspectives can be found on the [KBOR Website](#).

Announcements & Adjournment

Dr. JBR announced that recordings from past meetings are all available on the [KBOR website](#) and thanked Whitney Turner and Connie Richardson for their leadership. She also shared that KBOR is now passing the baton to faculty members. She shared that in addition to the upcoming KBOR-CCA launch event, there will also be an EIT meeting this spring and three upcoming Math Pathways Task Force meetings. Attendees are welcome to reach out to task force members with topics for their consideration.

Dr. JBR adjourned the meeting at 4:01p.m.
